

Two Notable November Indian Battles.

GEN. HARRISON

By ELMO SCOTT WATSON

THE approach of November brings with it the anniversaries of two battles which are notable in the long history of our wars with the Indians. On November 4, one hundred and forty years ago, the Indians scored one of their greatest successes against the white men and brought a sad ending to the military career of an officer who had made an honorable record in the Revolution. Twenty years later, on November 7, the situation was reversed. This time it was the white men who were triumphant and the victory started their leader on the road which led to the White House. The two battles were the defeat of Gen. Arthur St. Clair on the headwaters on the Wabash river in Ohio, near the Indiana-Ohio boundary line, November 4, 1791, and the victory of Gen. William Henry Harrison on the Tippecanoe river in Indiana on November 7, 1811.

The St. Clair defeat was the climax of a futile attempt by the newly-organized and weak federal government to subdue the tribes of the old Northwest who had been attacking immigrants along the Ohio river and raiding settlements in Ohio and Kentucky. An expedition of 320 regulars and 1,100 Pennsylvania and Kentucky militia, led by Gen. Josiah Harmar, had been sent against the Indians in 1790 but had ended in failure.

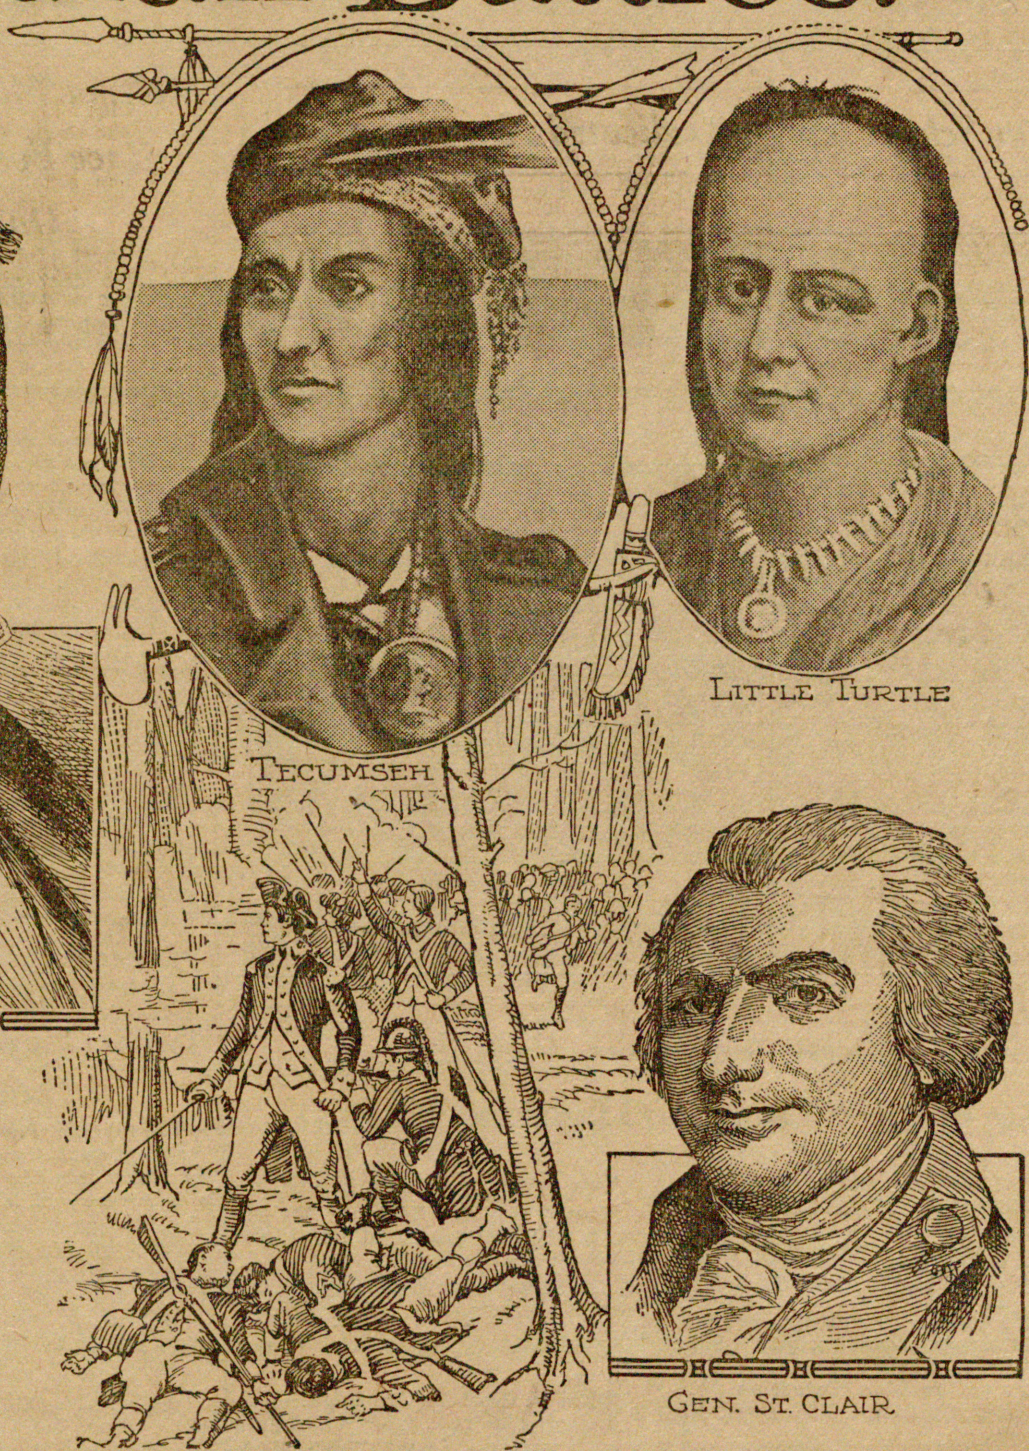

Next the United States tried to win peace in the Northwest by treaty but this failed. So another expedition was organized to proceed against the savages. This time President Washington gave the command to Gen. Arthur St. Clair, who had served with him in the Revolution. St. Clair was then sixty years of age and so seriously ill that he was unable to ride upon his horse and had to be carried in a litter most of the time. He was totally inexperienced in Indian fighting, as were most of his officers, and his men, composed of two small regiments of newly-organized regulars, two regiments of six-month levies and a large body of untrained militia, who were no better fitted for the stern task ahead of them than their leaders.

The arms and equipment of St. Clair's force were of the poorest sort, the commissary and quartermaster departments were inefficient and the outlook for the success of the expedition seemed doubtful from the start. When St. Clair arrived to take command and found the miserable stuff of the army which he was to lead against the Indians who had repulsed Harmar, he protested vigorously to his superiors. But they were either helpless to better conditions or indifferent.

So on October 4, 1791, the army got under way from Fort Washington. St. Clair's troubles increased as he advanced. Men straggled from the army despite warnings that they would be cut off by the Indians who were hanging on the flanks of the army, desertions were frequent and there was little if any discipline. Most of the time they had to cut their way through the dense damp woods or drag their weary feet over sodden prairies. Sickness increased and the soldiers were greatly disheartened by the constant sniping attacks of stray war parties.

By November 3 the army had reached the east fork of the Wabash. They were now near the principal Miami villages and it was St. Clair's plan to camp here, and erect a small fort. Here he would leave the sick and his extra baggage and push on to destroy the towns. By now his army was reduced to less than 1,400 men. They were camped in a clearing on a narrow rise of ground surrounded on every side by dense woods, except for a narrow road which they had cut through the forest to get to this place. A small creek ran through their camp which was pitched in the form of a long hollow square, pitched in the form of a long hollow square.

Early the next morning the men were paraded as usual at sunrise. It was a cold raw morning and they hurried through the parade to prepare their breakfast. Suddenly the sound of rifle shots was heard ahead and a few moments later the firing became general. Before St. Clair could form his line the advance party of the militia had been routed by the Indians and came running pell-mell back across the stream. They dashed through the camp, throwing the regulars into disorder. St. Clair's officers hastily rallied their men and poured in two quick volleys which drove the Indians back into the woods for a moment.

LITTLE TURTLE

GEN. ST. CLAIR

But the relief was only temporary. For within a few moments St. Clair's men found themselves surrounded. From every side the Indians were pouring a hot fire upon them. St. Clair had two small batteries of light guns and these were immediately unlimbered. But as they roared out their volleys they covered the army with dense clouds of smoke through which the men fired aimlessly at the hidden foe. The soldiers were becoming more disorganized despite the efforts of St. Clair and his officers to hold the line steady.

Ordering one of his officers to lead a charge with the regiment of regulars, he took advantage of this diversion to begin his retreat. But the moment that his undisciplined men started to retire along the narrow road, panic struck them. In a moment they lost all semblance of organization. The retreat soon became a rout and then a wild flight for safety.

As the soldiers ran through the woods the Indians followed close on their heels, whooping like demons. They sprang upon the unarmed men with knife and tomahawk and cut them down with almost no resistance. For several miles the pursuit was continued. The only thing that saved the army from annihilation was the fact that the Indians were in a hurry to return to St. Clair's camp for the rich booty which it contained. As it was, more than 300 of the Americans were killed and nearly 300 were seriously wounded.

Greatly encouraged by their success, the tribes of the Northwest continued their depredations and it was not until three years later that the vigorous campaign of "Mad Anthony" Wayne, culminating in the Battle of Fallen Timbers, broke the power of the Indians and brought peace to the harried frontier.

In Wayne's army was a young Virginian named William Henry Harrison who won the praise of Wayne for his bravery and coolness at Fallen Timbers. Soon afterwards Lieutenant Harrison, although he was only twenty-three years old, was made commander of Fort Washington and later the President appointed him secretary of the Northwest territory. Later when the new territory of Indiana was established, Harrison was made its first governor and superintendent of Indian affairs.

By 1809 the Indian situation had again become critical. Angered by white encroachments upon their lands and by what they claimed were violations of treaties the Indians were ripe for revolt. All they needed was a leader and this leader soon appeared. He was Tecumseh, chief of the Shawnees who dreamed again the dream of King Phillip and Pontiac for a confederation of the Indian tribes to resist the advance of the white man.

Tecumseh was greatly aided in his project by his twin brother, the Open Door, commonly known as The Prophet, who to Tecumseh's genius for leadership and organization added a religious appeal to influence the Indians to join in their scheme. Tecumseh did not want war until the Indians were strongly organized and some assurance of success was certain.

Early in 1811, however, it became apparent that hostilities would soon open. The United States and Great Britain were on the verge of war. British spies and agents were busy among the Indians seeking to win them to the English cause and the savages were making numerous attacks on the frontier settlements. In this emergency the President ordered Harrison to prepare for action, militia from Ohio and Kentucky and Indiana were called into service and placed under his command. But he was ordered not to assume the offensive unless it was absolutely necessary. Harrison, however, was inclined to disregard these orders. Tecumseh was then busy with his plans for the Indian confederation among the tribes of the South. But large num-

bers of warriors from the various northern tribes had assembled at The Prophet's Town on the banks of the Tippecanoe river in Indiana. Indian outrages were increasing and Harrison decided that the time had come for him to act.

When it became known that he intended to march against The Prophet's Town, volunteers from all over the west began pouring into Harrison's camp at Vincennes. By the first of November his force consisted of nine companies of regulars, eight companies of Indiana militia and dragoons, three companies of mounted riflemen, mostly from Kentucky, and a small company of scouts to cover his advance. Harrison had learned well his lessons in Indiana fighting from Wayne and would not make the mistake that St. Clair did.

After a march of five days Harrison with his army of approximately 1,100 men reached the vicinity of The Prophet's Town not far from the present city of Lafayette, Ind. On the night of November 6 he pitched his camp on a piece of high ground surrounded by a swamp. He intended to hold a conference with The Prophet the next morning. Fearful of treachery by the Shawnee leader, Harrison posted a strong guard under experienced officers about his camp and ordered his men to sleep with their guns loaded and bayonets fixed.

Harrison's experience in Indian warfare had taught him that it was a wise precaution to awaken his men early in the morning so as to be prepared in case the Indians should attack. He had just arisen at about four o'clock in the morning and was pulling on his boots when a shot broke the stillness of the early morning. It was followed a moment later by a volley of shots. One of the sentries had discovered a number of Indian warriors creeping through the underbrush towards him. He immediately fired and his shot opened the battle. The Indians immediately charged but Harrison's men were ready for them. The line of militia wavered and threatened to break and run but the regulars stood firm and soon there was fighting on every side.

Harrison rode up and down the line on a white horse, encouraging his men and giving them a fine example of coolness under fire. The charge of the Indians was met by a withering fire from the deadly squirrel rifles of the Kentuckians. They fell back but came on again a few minutes later. Again Harrison's men poured in a deadly volley and as the savages wavered and halted the Americans charged with the bayonet. The Prophet's braves broke and ran in every direction. The fierce little battle had lasted less than two hours but in that time nearly 200 of Harrison's army were killed or wounded. The losses of the Indians were never learned but they were probably equally heavy.

The battle of Tippecanoe had far-reaching results. It not only broke up the confederacy which Tecumseh had nearly completed but it also which Tecumseh had nearly completed but it also united force of Indians as their allies in the coming war with the Americans. Had Harrison suffered the fate of St. Clair the War of 1812 might have had a different ending. But it is certain that another Indian triumph would have delayed white settlement in this region many years. The battle also had important political results. It made Harrison a popular hero and in 1840 when the Whigs saw that they had a chance to win the Presidency after the panic year of 1837 had weakened the Democratic party, they persuaded Harrison to become their candidate. The slogan of "Tippecanoe and Tyler, too" and the symbols of the lob cabin, the coon skin and the hard cider barrel proved to be potent ones and Harrison was swept into the White House on a wave of popular enthusiasm.

MALE AND FEMALE SENSE OF HUMOR

Observer Sees Difference Between Sexes.

The things that men think are funny are often anathema to the average woman. I am thinking particularly of the way men greet each other after a separation. If they are old friends and really quite fond, each leaps at the other with cries of vituperation sufficient to alienate two women for life. "Hello, you big so and so! What are you doing out of jail?" This elicits a delighted retort, "Why, you poor old graybeard! I thought you'd be dead by this time! Your new false teeth look terrible!" Research into masculine reactions has taught me that such a procedure is not only a mark of deep affection, but is considered howlingly funny as well. Women have the habit, far more pleasant, if less sincere, of smothering each other with compliments. "Darling! You look perfectly marvelous! I've never seen such a ravishing hat!"

Then there is men's love of the practical joke that few women share. One of the meanest jokes I ever knew one man to play on another furnished amusement for years, and never fails to stir masculine risibles when told. The victim became a bit befuddled from a too-liquid diet at a convention banquet, and went to bed early in his hotel room. About twelve o'clock his roommate came in, and started to undress. The sleeper came to sufficiently to notice that his colleague was brushing his teeth in the bathroom and muttered, "What time is it, Bill?"

"Seven-thirty!" yipped Bill, "time to get up and go to work! If you're not on hand this morning, the boss will give you the devil. He knows you winked out on the party last night!" Whereupon the befuddled one got up laboriously, took a bath, shaved, dressed and left the room hatted and coated ready for business. He did not discover the time until he got downstairs in the hotel lobby. Meantime, the jester, laughing loud, went to bed. This is a typical joke of the kind no woman could forgive. While they delight in embarrassing each other with sly, catty subtleties that men scorn to employ, they seldom resort to such practical jokes.

The unexpected application of electric current is sufficient to send the soberest man into frightful guffaws. Once at a bottlers' convention where the problem was to make a well-known tightwad contribute to a fund for an advertising campaign, some wag thought up the following ruse: The metal chair occupied by the tightwad was wired for electricity controlled by a button within reach of the chairman. When the meeting came to order, the chairman called for contributions in impassioned language.

"Come on now, boys! Let the first fellow who is willing to contribute \$100 to this campaign rise to his feet! Just get up if you've got \$100 to give!" With that he turned on the current and the outraged tightwad leaped nimbly to his feet. "Ah!" cried the chairman, "Mr. X—contributed \$100! Thank you, sir, thank you!" Although admitting the cleverness of the trick, no woman would dare try such tactics on one of her sex.

For another example, take slapstick comedy. From the average feminine viewpoint, what is so funny about a tremendous smack? Slapstick takes its name from one of the properties of the early burlesque show, an entertainment which catered to "men only." It consisted of two flexible boards joined at one end by a handle. A wallop from the boards induced no actual pain, but made a loud clapping noise which never failed to bring the house down. So popular was this high form of entertainment that the word "slapstick," which was originally a noun, became an adjective. Undoubtedly it was a development of the inflated bladder used by the court jesters of old. When the bladder was blown up and put on the end of a stick the jester used it to hit men over the head. A comparatively light blow made a frightful noise which threw the monarch into convulsions of laughter. Any woman is likely to look upon such an exhibition as more vulgar than humorous.—Indianapolis News.

Hope Eternal

Owen—When can I expect payment on that debt you owe me?
Moore—Always.

Is Your Rest Disturbed?

Treat Disordered Kidney Function Promptly.

A nagging backache, with bladder irritations; burning, scanty and too frequent passage and getting up at night, may warn of disordered kidney function. Thousands recommend Doan's Pills in these conditions. Praised for 50 years by grateful users the country over. Sold by dealers everywhere.

Ice Sixty Years Old

Steam shovels struck a mass of frozen debris during stripping operations in Yorktown, Pa., at a time when the workmen were almost prostrated by the hot weather. Dynamite had to be used to crack the ice which had formed nearly 60 years ago during a severe winter. Waste materials from the coal mines had insulated the frozen debris so that it never thawed.

Following Orders

"Why, Martha," cried the thin sister, "why on earth are you boiling all those chocolate bonbons?"
"Well," sighed the stout girl, "I am on a liquid diet for awhile."

DROWN YOUR HEADACHE In This Cup of Tea!

Lazy intestinal movement causes painful headaches. When the system clogs, make yourself a cup of fragrant Garfield Tea. Its effects are prompt—gentle but decidedly certain. The sense of heaviness vanishes from your stomach. Garfield Tea is thoroughly harmless and the sure, pleasant way to flush the bowels.

NEW LENOX

The R. N. A. will hold a Halloween card party October 30 in Urich Hall. Games in keeping with Halloween will be played, also cards and buncos. Mrs. Alice Devore, Mrs. Gladys Brown and Mrs. Dorothy Osmus are the women in charge.

Mrs. Eliza Oram has returned from the home of her daughter and son-in-law, Mr. and Mrs. Albert Wason in Waterloo, Iowa, where she spent the summer. She is staying with her son William in Joliet. Her granddaughter, and grandson, Mr. and Mrs. Ernest Wason, returned with her and went on to Ohio and Washington, D. C.

While cranking her Ford last Monday morning, Mrs. Harry Hafka, injured her hand quite severely. She had five stitches taken in it.

Mr. and Mrs. Walter Mattes of Chicago, spent the week in the home of the formers' sister, Mrs. George Woodcock.

Mr. and Mrs. Robert Nelson and daughter, Mr. and Mrs. Henry Miller and daughter Lois, were dinner guests in the home of Mrs. Mae Corp in Chicago Sunday.

Rev. and Mrs. J. Dingle and the latter's mother, Mrs. Sara Beach returned home Saturday from a week's visit with relatives and friends in Yorkville, Roschell and Morrison, Illinois.

The Junior Missionary Society of the M. E. church gave a Halloween party in the home of the Misses Elizabeth and Ann Gougar Saturday night. Out of town guests were Robert Rose, Jack Flatterly and Chas. McEwan of Joliet, Roy Minger of Spencer and Peter Schulte of Frankfort. Games were played and refreshments served by the hostesses.

The following members of the New Lenox Woman's Club joined the auto trip made by the Will County Federation of Women's Clubs to Elgin and Dundee, Thursday: Mr. and Mrs. Fred Francis, Mrs. Juliet Warner, Mrs. C. H. Smith, Mrs. Amanda Fink, Mrs. Alice Devore, Mrs. Constance Robinson, Mrs. Adele Groves, Mrs. Josephine Sayers, Mrs. James Owen, Mrs. Vera Osmus and Mrs. Martha Spec-king.

Rufus Ramsey, Jr., is recovering from a recent illness in the home of his parents, Mr. and Mrs. R. Ramsey, Sr.

Mr. and Mrs. H. A. Fink and family spent Sunday in the home of Rev. and Mrs. D. C. Hennig in Melrose Park, Ill.

Mrs. Wm. Weber of Joliet spent the week end in the home of her daughter and son-in-law, Mr. and Mrs. A. W. Walsh.

Miss Beatrice Walsh is suffering from a prolonged illness in the home of her parents, Mr. and Mrs. A. W. Walsh.

A group of friends surprised Mr. and Mrs. Charles Reiser in their home Sunday night in the form of a party. Cards formed the diversion. Guests were Mr. and Mrs. James Walsh, Mr. and Mrs. John Walsh and sons, Mr. and Mrs. De Signor, of Joliet, Mr. and Mrs. Peter Sinclair, Mr. and Mrs. A. W. Walsh and Mr. Ray Walsh of New Lenox.

An auditors meeting was held at the New Lenox State bank Monday. The regular monthly meeting of the directors of the New Lenox State bank was held Wednesday in the bank.

The Frankfort-New Lenox 4H Calf Club will meet Nov. 3rd in the home of Howard Strausenberg.

Robert and Billy Penn, sons of Mr. and Mrs. Wm. Penn of Brookwood Park, are recovering from minor operations performed Saturday in the Silver Cross hospital.

Mr. and Mrs. John Loucks returned home from their wedding trip to Conway Springs, Kansas. While

there they were guests in the home of Mr. and Mrs. Sidney Wason.

Mr. and Mrs. Bert Brown were dinner guests in the home of Mr. and Mrs. E. L. Strayer Sunday.

The Women's Guild of the Grace Episcopal Church will hold a bake sale in the Archie Corp store on Saturday, October 31st at 2 p. m.

The Woman's Guild of the Grace Episcopal church will meet November 4th in the home of Mrs. F. Gould with Miss Bess Jones as assistant hostess. A special plea has been had from Cathedral Shelter, Chicago for any types of clothing members can spare. Jelly may also be brought. The boxes are to be packed at this meeting.

Services in the Grace Episcopal church on All Saints Day, November 1st will begin with celebration of Holy Communion at 9:30 a. m. Rev. Geo. A. Ray will be the celebrant.

LUTHERAN MISSION
New Lenox, Illinois.
Rev. Paul E. Schauer.

Sunday afternoon divine worship is conducted in the English language in the Grace Episcopal church at 2:00 o'clock by the Rev. Paul E. Schauer. Sunday school at 1:00 o'clock. Come to church Sunday and bring others.

FRANKFORT

Mr. and Mrs. Henry Geuther, Sr., Mr. and Mrs. George Geuther, Sr., Mr. and Mrs. Andrew Schroth, Mrs. Henry Schroth, Mrs. Charles Pfeifer, Mrs. Frank Cheney, Milton Pfeifer, Mr. and Mrs. Wesley Hollstein attended the funeral of Rev. Heiber in the Sedan Prairie church last Thursday afternoon.

Mrs. Max Haass who underwent a major operation Wednesday morning in the Silver Cross hospital is improving nicely.

Mrs. Frank Cheney spent Friday in Chicago Heights with relatives. The Ladies Aid society of St. Peter's church will give a chicken supper in the church basement, Thursday evening, November 5.

Mr. and Mrs. George Haass, Mrs. Julius Pfaff, Mr. and Mrs. Charles Pfaff, Jr., Miss Eva Jean Pfaff, Mr. and Mrs. Charles Pfaff, Sr., Miss Sylvia Pfaff, Mr. and Mrs. Walter Pfaff and daughter June, Mr. and Wilford Moak, and son Wilford, Jr., Mr. and Mrs. Dick Folkers, Miss Bernice Folkers and Miss Lena Bankow of Frankfort; Mr. and Mrs. Albert Pfaff and Miss Lois Pfaff of New Lenox attended the 10th wedding anniversary of Mr. and Mrs. Fred Pfaff at their home in Joliet, which was a surprise to them. There were twenty-four guests present. Bridge and Pinochle was played with prizes awarded to Miss Bernice Folkers.

Now

GAS IS CHEAPER

and it's not too late to heat your home with this ideal fuel THIS WINTER

THERE is still time to have carefree gas heating service for your home this winter. And because a new gas has been brought into northern Illinois, it has been possible to reduce the cost of this most modern of fuels approximately 30%.

Let us figure your cost

To show you just what this reduction means to you, we will be glad to send one of our house heating engineers to call at your home. At once—and without obligating you in any way. He can prepare an estimate of just what it will cost to heat with gas under the new rates.

Remember in comparing gas with other fuels that it offers you completely care-free heating service. A temperature regulator in the living room takes full charge of the furnace—orders your fuel as you need it—keeps the whole house comfortably, healthfully warm.

Install gas heat now

Why not install gas heat now—for the coming winter. You can begin to enjoy its many advantages during changeable fall weather. When temperatures drop temporarily, your gas heater will start up automatically. As soon as the house is comfortable, off it goes again. Because

the heater works automatically, you waste no fuel.

And, of course, you're through with shoveling coal, fussing with drafts, carrying out ashes forever.

In most cases your present heating plant can be "converted to gas" at small expense. A gas-burner can be installed in the fire-box whether your system is warm air, hot water or steam. The Public Service Company's testing laboratory has approved half a dozen of these conversion burners—will be glad to recommend one exactly suited to your home.

Mail the coupon

If you will mail us the coupon below, we'll send one of our house heating engineers to call on you. He will not only tell you all about the new gas heating rates and conversion burners—but also estimate just what gas heat will cost during an average heating season.

PUBLIC SERVICE COMPANY
OF NORTHERN ILLINOIS

Gentlemen: Without obligating me in any way, please send one of your heating engineers to tell me all about the new gas heating rate, gas conversion burners—and to estimate what it will cost to heat my home with gas.

Tall Poles Carry Wires Over River

For more than two decades, the giant cedar telephone poles shown above have supported local and long distance telephone lines crossing the Skagit River at Mount Vernon, Wash. Each 115 feet tall, they are three times the height of the usual telephone pole.

TELEPHONE LINKS AUSTRALIA WITH SOUTH AMERICA

Radio telephone service has recently been inaugurated between Australia and the three South American Republics of Argentina, Uruguay, and Chile. Connection is made through the station at Rugby, England.

TALL POLES SUPPORT WIRES CROSSING RIVER

Thrice Normal Height, They Have Carried Telephone Lines for Two Decades

For more than two decades, two giant cedar telephone poles, each 115 feet tall, have supported local and long distance telephone wires crossing the Skagit river at Mount Vernon, Wash.

Built in 1910 on the general plan of a suspension bridge, the crossing, 520 feet in length, is remarkable for the great height of these poles on either side of the river, each three times the height of ordinary telephone poles.

Mount Vernon-Anacortes long distance wires, and a lead-sheathed telephone cable containing wires that connect homes on the west side of the river with the Mount Vernon central office, are carried across the river by the span.

Each of the poles has a heavy double cross arm. Two strands of half-inch steel cable, carried over the ends of the cross arms, support three fixtures spaced at equal distances over the river. These fixtures, in turn, each consisting of four cross arms strapped together with vertical angle irons, support the copper telephone wires and the telephone cable.

In spite of their twenty years' service and the constant heavy strain, the poles are in excellent condition, a recent inspection showed. Twice within the last 10 years linemen have ridden out on the span to make wire repairs.

The crossing was built by the Pacific Telephone and Telegraph Company in 1910, but it is now a part of the West Coast Telephone Company's system, which acquired it some years ago.

OPERATOR RECEIVES VOTE OF THANKS FOR SAVING SCHOOL

Alertness on the part of Mrs. Goldie Ellis, night operator at the Arlington office of the Riverside, Cal., telephone exchange, recently saved the new \$200,000 Chemawa Junior High School from probable destruction by fire. She answered a signal light at the switchboard shortly before midnight, but got no response to her "Number, please?" and heard strange sounds instead. Determining that the telephone line was that of the new school, she notified the police, who upon their arrival found a fire there. The Riverside Board of Education has given Mrs. Ellis a special vote of thanks since the prompt discovery of the blaze undoubtedly saved the building.

FRIENDSHIP RENEWED AFTER 50 YEARS BY TELEPHONE

A chance glance at a telephone directory paved the way to a renewal of friendship after fifty years for James P. Ramsay of Lowell, Mass., probation officer for Middlesex county in that state. Not being sure of the address of a friend, he looked up the name in the telephone directory, and in turning the pages, spied the name of George Atherton. Many years ago he had worked with a young man of that name, but half a century ago they separated, due to a change of employment, and they had never met since then.

Believing that the George Atherton of Chelmsford, Mass., whose name appeared in the book, might be related to his former friend, Mr. Ramsay called the number and learned that it was his former friend. The next day they met and the friendship of half a century ago was renewed.

Will County Religious Council Meets

The Will County Council of Religious Education held the first meeting of the year Sunday afternoon October 25th at the First Presbyterian church in Joliet. The president, Tom Patterson presided.

The meeting was opened with a prayer by Rev. Mr. Jensen of Crete. Mrs. Arthur Stark, secretary and treasurer, gave a report. Reports were also heard from the various districts. Mrs. Ruth Hartman told about

Kate Smith Meets, Defeats, Army of Fans

KATE SMITH, radio's recent discovery, who sings four times a week on the La Palina Program over the air, has been finding a sizable fan army awaiting her each day after she emerges from her appearances at the Palace Theatre on Broadway. Now there is probably no one in radio who is more appreciative of her fans than is Miss Smith. Veterans of the wars, particularly those who have been disabled in service, find a ready welcome from this ex-nurse who now entertains them on the radio. But to those Broadwayites who didn't know her in the old days and who now seek to take her to their bosoms she isn't so warm. Leaving the theatre recently she was greeted by one member of the profession with: "How do you do, Kate. How is your mother?" Cold eyes turned on him. "Why do you want to know?" the radio star returned. "She never asks about you."

the splendid all day convention which was held last Sunday in Dist. 1, Wheatland and DuPage townships. Rev. L. V. Sittler, pastor of the Plainfield Methodist church reported that steps are being taken to organize the township and plans are under way for a course in leadership training. Rev. Sittler is the young peoples' division superintendent for the county and at his suggestion plans for a County Young Peoples' Conference was discussed but no definite steps were taken.

Mr. Walter Meyer of Peotone reported for Dist. 7, Peotone, Wilton and Manhattan. Mr. Edward Sproat and Mr. Morton reported on the work in Joliet. Mr. Wallace Oleson of Crete told of the newly organized council in Dist. 8 which includes Crete, Monee, Will and Washington Townships.

The resignation of Miss Dorothy Zenser, Joliet who has served as vacation and week day superintendent for the county, was accepted. There was a discussion on the matter of raising the budget. Miss Laura Siemsen of Peotone is the new budget officer.

The announcement was made of the Twelfth Annual State Young People's Conference which is being held in Pontiac, October 30, 31 and November 1. The meeting was closed with prayer led by the president.

Mokena Boy Scouts Should Be Supported

One of the big problems of every community, be it large or small, is how to keep the boys of the community occupied, how to divert their energies into proper and useful channels and how to inculcate high ideals into the youths of today who will be the men of tomorrow. If we do not help the boys of today to attain to the things that endure and stand for that which is clean and upright and just, how can we expect the men of tomorrow to be up right, intelligent citizens? How can we obtain leaders who will lead our great nation onward to higher aims and goals if we do not train our boys for leadership today?

The boy's nature is to emulate some noted man of his time. If the boy is given the proper backing he will emulate the great men of our nation who have contributed so much to build up this great world power which we call the United States of America. In order that our nation can continue to remain great and be a blessing to all other nations on the face of the globe, we must perpetuate the high ideals of the great founders of this democracy and in order to do this we must have leaders and men who will

"carry on" the principles of the founders of America.

Mokena as well as other nearby towns need the Boy Scouts and it is hoped that the parents of the boys in these communities will back up the men who are promoting the Boy Scout work in these towns, 100 per cent. Let us make real men of our boys so America can have more Washington's, Lincoln's, Edison's Roosevelt's and great business men. Let us see to it that we do not rear any future Capone's, murderers and gangsters who today are a curse to America and any other nation which tolerates them.

The editor of this paper feels that there is no organization that

can do more to train our boys to be worthy and noble men of tomorrow than the Boy Scout organization.

In Mokena a decided move is on foot to put the Boy Scout plan over and the men who are backing up the movement should have the whole hearted support of the entire community. So far one patrol of eight boys has been organized in Mokena. The boys will meet every Saturday night in the Mokena school auditorium at 7:30 o'clock. All boys over 12 years of age, whether residents of the village or the territory immediately surrounding Mokena are invited to join the Mokena Boy Scouts. There is no reason why Mokena cannot have a flourishing Boy Scout organization.

The Tinley Park Dramatic Club Takes Pleasure in

Presenting for the benefit of the P. T. A. the Three Act Comedy Drama "NORA, WAKE UP"

FRIDAY NOVEMBER 6, 1931 IN THE SCHOOL AUDITORIUM

CHARACTERS

In order of their first appearance

BRIDGET HONORA CALAHAN (NORA)

—An up-to-date daughter,—Pearl Boldt

Mrs. Peggy Calahan—Her old-fashioned mother—

Alice Anderson

Carlyle Coleridge—A tramp for his health— Charles Sanders

Johnny Calahan—Mrs. Calahan's Son — Henry Boldt

Danny Millens—Johnny's friend in love with Nora—

Walter Bruening

Mrs. Edmonton—An ultra-modern mother— Anna Clemens

Edmond Edmonton—Her son, a four-flusher—

Ernest Anderson

Katie Schwartz—An obliging neighbor— Ruth Funk

Director — Trudie Noehring Swisher

Business Manager — Jennie D. Klepper

Synopsis of Acts

Act 1—Living room of the Calahan home. The middle of a summer morning.

Act 2—Same as act one. NORA'S DREAM, the same night.

Act 3—Same as in previous acts. The following morning.

Musicians

Pianist — Frederick C. Erickson

Violinist — Tony Kososki

Drummer — Selby Hirsch

Join the P. T. A.

It is our duty to the school to love it, and to support it morally and materially. Any person in the community who is interested in the objects for which this association is organized is cordially invited to attend all of the meetings. You need not be a parent to become a member.

Telephoning to Sunken Submarine From Submarine Marking Buoy

Chief Electrician's Mate Tests New Life Saving Apparatus for Submarines.

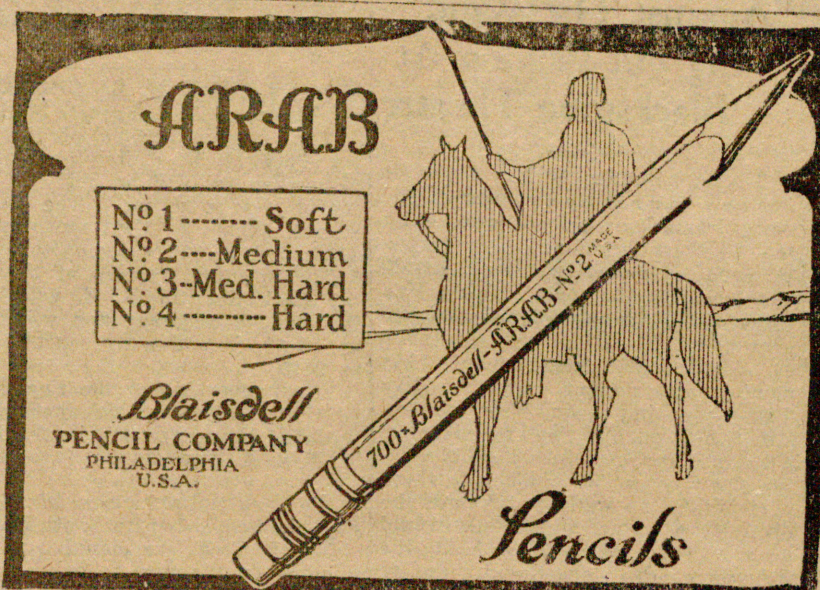

ONE of the latest safety devices adopted by the United States Navy is the Marking Buoy for submarines. When the submarine sinks to the bottom of the sea, either by accident or by design, the buoy may be released from the submerged submarine to

mark the spot where she lies. The buoy is equipped with a telephone, a light, and tubes for air and food. In the illustration, a telephone test is being made at Portsmouth, N. H., from the new buoy to the submarine S-22 which lies submerged below.

Leviathan in Voice-Reach of Land As "Ship-to-Shore" Service Opens

Control Board
New York City

Foreign Service Section of Long
Distance Switchboard, New York City

The Third Operator From the Right is at the "Ship-to-Shore" Position on the Switchboard Where Telephone Calls Pass to and From the Leviathan.

By H. M. CARLETON

Time and space, once such great barriers standing in the way of the swift conduct of the affairs of men, received another annihilating blow when telephone service was opened between all Bell telephones and the S.S. Leviathan, flagship of the U. S. Lines and the largest vessel afloat. So science adds another achievement to the long list of those which "are shrinking the circumference of the earth."

Although actual service has just recently been opened to the public, two-way radio telephony between the telephone network on shore and a ship at sea was accomplished by Bell System engineers as early as 1916. On that occasion the Secretary of the Navy in Washington and the Captain of the U. S. S. New Hampshire, carried on a two-way conversation over land wires and radio connections. This trial was part of the communications preparedness work carried on by the Bell System in cooperation with the government. The experiment was highly successful, but the development was not carried to the point of establishing regular service to the public because conditions prevailing in the shipping world did not seem to justify this type of service.

Times have greatly changed, even in thirteen years or so. Thousands more travel to and from foreign lands. Talking to people over long distances by telephone is a commonplace experience in our lives. A commercial ship-to-shore telephone service now meets a need of transatlantic travelers. During these thirteen years much has been learned and many contributions made to theory and practice in the field of radio telephony. The scientist and engineer have been continuously at work at Deal Beach, New Jersey and other experimental stations of the American Telephone and Telegraph Company.

One of the great difficulties to be overcome in the rendering of this new and specialized telephone service arises from the fact that the receiving and transmitting stations aboard the Leviathan must be located close together, while radio telephone stations for receiving and sending on shore can be located

many miles apart, thus avoiding the danger of interference. To prevent this interference, which would quickly render the service useless, it becomes necessary to use separate wave-lengths for transmitting and receiving.

Let us take a glance at the pathway of a call between the Leviathan and some city on shore. Imagine yourself in Atlantic City, New Jersey. That city comes to mind because the first call to the Leviathan after the service was opened originated there. The Atlantic City operator takes your call in the usual way. She sets up a connection to the long distance headquarters of the American Telephone and Telegraph Company at 24 Walker street, New York. Here there is a special ship-to-shore operator, as you can see by the picture above. She is given the name of the person wanted aboard the Leviathan, and she plugs in to the proper jack on her switchboard. The current runs from Walker street to Deal Beach, New Jersey, where it is amplified many millions of times by the large water-cooled vacuum tubes and transformed into radio waves. These are received by the apparatus on the ship, amplified again and travel over wire to the private telephone booth where an attendant answers. He is told who is wanted and brings your friend to the telephone.

We have already traced the way your speech will travel. Now let us trace that of your partner in the conversation. His voice travels from the telephone where he is talking to the ship's sending apparatus where it is amplified and transformed into radio waves. These travel to Forked River, New Jersey, where they are "picked up" by the receiving antenna, amplified again, and transformed into voice currents which run to the long distance office at Walker street, New York, and from there to your telephone in Atlantic City. And all this happens in a fraction of a second.

The antennae used for ship-to-shore radio telephony are interesting, especially in one respect. In the case of transatlantic vessels the course is along fairly well defined lanes which make it possible to use directive antennae for transmitting to them and receiving from them. Directive antennae are of very great value since they concentrate

the radio waves in the direction required. Receiving antennae of the directive type serve the two-fold purpose of receiving signals best from a particular direction and thus also reducing the interference coming from other directions.

It is not possible to take advantage of directive antennae on ships, but these special types of land transmitter and receiver help materially to offset the limitations of the ship as a site for radio telephone equipment. The land transmitter is quite powerful, about 15,000 watts. The ship's apparatus has only about one-thirtieth this capacity, but since the receiving conditions on land are much more favorable than on shipboard, the quality of the transmission from ship to shore and shore to ship is about equal.

In the radio transmitters of the Leviathan and the Deal Beach station, use is made of high power vacuum tubes. Those at Deal are of the water-cooled type, two feet in length and weigh about ten pounds. Similar in construction and operation to much smaller tubes used in telephone repeaters on land circuits, the water-cooled tubes play an all-important role in amplification. Instead of the whirling wheels and flashing sparks characteristic of the wireless in its early stages, the vacuum tube, in a quiet and efficient manner, amplifies the tiny electric currents from the telephone transmitter several million fold. These currents are sent to the transmitting antenna from which radio waves are projected, strong enough to carry the human voice over the hundreds of miles of space.

Today we can talk to but one ship, the Leviathan. But like all the other scientific developments in the field of communication the service is expected to spread from one ship to another until, within a few years what is now a novelty will be a commonplace, and people will think no more of calling a friend on a ship anywhere at sea than they now do of telephoning from one city to another. The transatlantic service also has become increasingly popular, and where the service was opened with one long wave channel, there have been three short wave channels added and a telephone cable to supplement these it is expected will be operating in 1932.

A Building Dedicated To Telephone Service

Headquarters Building at Cleveland

One of the finest telephone buildings in the country is the headquarters building of the Ohio Bell Telephone Company at Cleveland. The cornerstone of this building was laid June 15, 1926, and it was occupied on May 31, 1927.

This graceful building, modern American perpendicular Gothic in design, rises 22 stories above the ground, with three floors below grade. It houses the local, divisional and general offices of the Ohio Bell Telephone Company with more than 2100 telephone employees. The building was erected at a cost of \$5,000,000, and the telephone equipment cost \$6,000,000.

"PERSONAL SHOPPER" AT TELEPHONE BOOSTS SALES

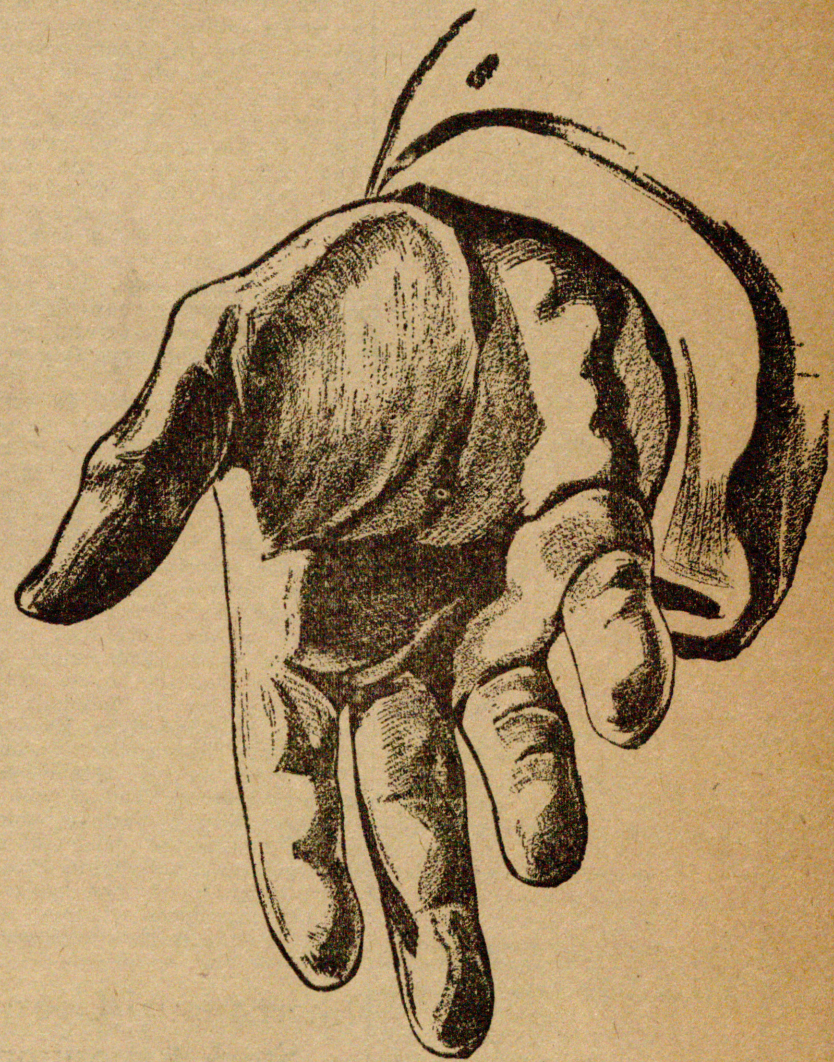

Personal shopping service is the latest type of salesmanship effort to enlist the aid of telephone selling. The sales possibilities of the telephone were first realized by grocery stores and since its adoption in that field it has spread to other and more varied lines until now it is regarded by many organizations as a necessary and efficient factor in sales promotion.

A Birmingham, Alabama, department store which recently introduced the telephone in its personal shopping service reported that while it had been accustomed for some time to call customers advising them of approaching sales, this feature was now reinforced by the customers' ability to call the Personal Shopper, young women of established reputation for careful selection and possessed of the confidence and trust of the public. Two women operating the Personal Shopping service telephone selected charge customers to inform them of special bargains in merchandise. The return from these calls, though varying with the type of goods offered, proves the efficiency of this particular sales method; the department averages 125 to 150 calls per day and out of this number 30 to 50 units of merchandise can be sold daily.

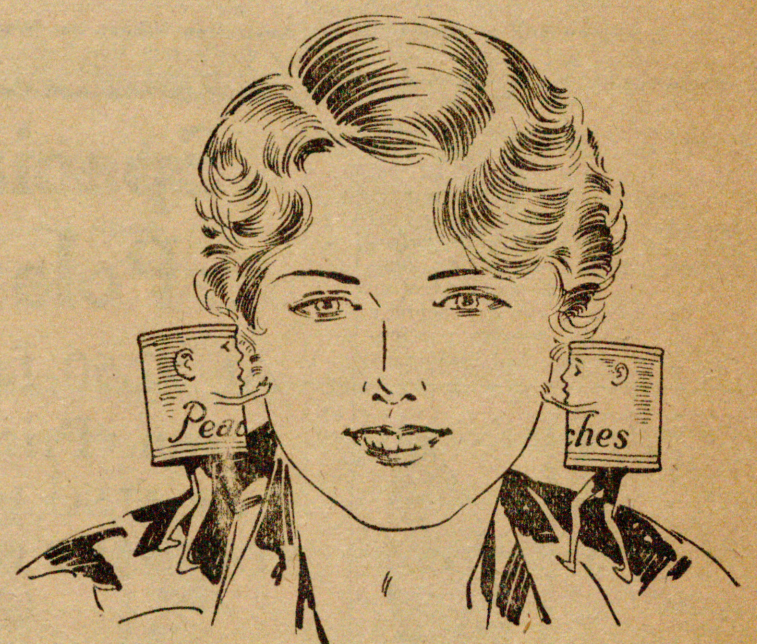

NEW YORK BIGGEST USER OF OVERSEAS TELEPHONE

New York leads all the states in the number of transatlantic telephone calls that originate in this country. After New York the states using the transatlantic service most heavily are Illinois, Pennsylvania, California, New Jersey, Massachusetts and Florida.

Following the 40 per cent reduction in transatlantic rates in March 1928, there has been a marked increase in the number of calls across the Atlantic. A little more than half of these calls are made to England, most of which are to London, but calls are made regularly to the various countries on the continent which have been connected up with the service. Probably more of these calls, however, go to Paris than to any other city on the continent, but London exceeds Paris in the number of such calls.

We Congratulate Tinley Park on their Beautiful New School

The Precious Peach

NO hostess upon whom an unexpected demand is made in the way of food need feel herself deserted by fate if there is a can or two of peaches left in the larder. She can turn them into something good for whatever the occasion may require — as for instance, peach toast for breakfast or peach whip for a luncheon or dinner dessert.

Peach Toast: Beat one egg slightly, add three-fourths cup milk, one teaspoon sugar, and one-fourth teaspoon salt. Dip eight slices of bread in mixture and sauté golden brown in butter. Dip eight halves of canned peaches in flour and sauté golden brown in the same skillet. Place half peach on each slice of toast, pour over the following sauce and serve hot.

Sauce: Melt one tablespoon butter, add one tablespoon flour, and stir smooth. Add slowly one cup peach syrup, stirring constantly until thick and smooth. Season with cinnamon.

A Dainty Dessert

Peach Whip: Drain juice from one No. 2½ can peaches. Measure juice, and add enough water to make two cups. Add three tablespoons sugar and one-half cup minute tapioca. Cook in double boiler until tapioca is transparent and clear, add sliced peaches, and cook a few minutes more. Cool slightly, add one-fourth teaspoon vanilla, and fold in the stiffly beaten whites of two eggs. Serve very cold with cream.

Fighting Undulant Fever

Bureau of Public Welfare
Rural Nursing Service
Irene O'Connor R. N.

Undulant fever is a newly recognized disease in man. It is a disease of long standing in domestic animals. Man gets the disease from infected animals. Control work must therefore include activity toward cradling the disease in animals. Recognizing this fact, together with a knowledge of the great economic loss caused by Bang's disease and Trauma's disease respectively in cattle and swine, the State Department of Agriculture and the University of Illinois have undertaken a comprehensive and practicable program designed to eradicate these diseases, which are the source of undulant fever in humans from among domestic animals in this State. Very significant progress has already been made.

There are 678 herd-owners, according to Dr. Robert Graham, animal pathologist at the University of Illinois, in 81 counties owning 16,232 head of cattle who are subjecting their herds to repeated tests for the infections and eliminating reactors. As a result of this effort there are now 51 accredited herds in the State and 69 veterinarians have been trained in the application of the preliminary test and are approved for this work by the State Department of Agriculture.

Since the suppression of Bang's and Trauma's diseases in animals has the effect of preventing undulant fever in man, the work referred to has a great public health value. In conducting the program against undulant fever, the University of Illinois has prepared and distributed a bulletin on the disease which gives a good conception of the problem. It reads as follows:

1. Malta fever is a disease in man caused by *micrococcus melitensis*. This organism was first isolated in 1887 from a fatal case of Malta fever on the Island of Malta, but not until 1905 was Malta fever in man definitely associated with milk from goats.

2. According to the classification of Evans, Malta or undulant fever, as it is known in the United States, may be traced to one of three closely allied organisms—*Brucella melitensis* of goats, *Brucella Bang* of cattle, *Brucella Trauma* of pigs. These different types of *Brucella* may produce clinical manifestations in their respective animals hosts, but often the disease is occult in character and infected animals may serve as carriers.

3. The act of abortion is a common symptom of the infection in cattle and swine, but less frequently in goats. So far as known, *Brucella* infection is not a factor in abortion in women. This disease in cattle is frequently accompanied by temporary or permanent sterility and decreased milk production.

4. Bovine infectious abortion is widespread in Illinois and other cattle-raising states. The infectious character of the disease was first established in Denmark in 1897 by Bang. In 1912 the specific character of abortion in American cattle was established by McNeil of the Illinois Experiment Station. The same year Schroeder and Cotton encountered the organism in the milk of infected cows. In 1914 the specific character of abortion in swine was recognized by Trauma, while in 1923 the biological relation of *Micrococcus melitensis* to the abortion bacillus in cattle and swine was recognized by Evans. The classification of the Malta fever abortion group recognizes three types; namely, the goat, cow and pig types of the *Brucella* genus.

5. In the United States, Craig in 1905 recognized the first case of Malta fever in man and pointed out additional cases in American soldiers who had become infected in the Philippines. From the introduction to his report we quote the following, "I am convinced that a careful study by use of the Widal test and the agglutination reaction with *micrococcus melitensis*, of many of the cases of obscure continued fevers which are prevalent in this country, will result in the demonstration that Malta fever is by no means a rare disease in the warmer portions of the United States, and that many

of the so-called anomalous cases of typhoid fever are, in reality instances of the infection with the organism of Malta fever. In 1911 Ferenbaugh reported the first indigenous occurrence of the disease in Texas, traceable to goats. Keefe in 1924, reported the first spontaneous case of undulant fever of American origin supposedly traceable to the bovine type of the infection. Evans, Carpenter, Huddleson, and others have confirmed his finding.

6. Undulant fever in the north central United States is a disease of young adults. The greatest number of cases has been reported by Hardy in Iowa and Lee in Indiana. More men than women are victims. Farmers constitute the largest single group that have suffered from undulant fever. Contact with animals may explain, in a measure at least, the age and occupational factors in the occurrence of the disease, while cases of undulant fever appear to be increasing each year. This may be due to a greater knowledge of the symptoms and more careful methods in diagnosing and reporting suspicious cases.

7. There is evidence to suggest that undulant fever may be transmitted by direct contact with infected farm animals. Milk cows infected with the disease commonly harbor the bovine type of the *Brucella* infection, which is suspected as a factor in the occurrence of the disease in man. However, the types of *Brucella* organism isolated from human patients in the Corn Belt incriminate the swine strain much more frequently than the bovine strain.

8. Prevention of undulant fever in man is primarily a problem of controlling the disease in animals. Clean herds may be established by testing, isolation, and disposal of reactors. Proper pasteurization of milk eliminates the danger of undulant fever as a milk-borne disease in man. Infection of man by contact is another problem.

—Illinois Health Messenger

International Live Stock Exposition Nov. 28 to Dec. 5

Early entries pouring into the headquarters of the International Live Stock Exposition, to be held at the Chicago Stock Yards this year November 28 to December 5, gives assurance of one of the largest displays of livestock and educational agricultural exhibits in its history. So reports B. H. Heide, secretary-manager of the exposition.

Celebrates Thanksgiving Season.
The coming 32nd anniversary of this world's largest exposition of the meat making breeds of livestock will open its doors upon the mammoth International amphitheatre and 22 adjoining buildings on the first Saturday following Thanksgiving. Each day and evening will be crowded with events of education, inspiration, and entertainment to the visitors from town and country who combine to make the International Live Stock Exposition the most cosmopolitan agricultural show in the land.

Officials of the International Grain and Hay Show, a department of the Live Stock Exposition, but in itself the world's largest competitive display of small seeds, hay, and grain, state that in spite of the drought this year, they look for the largest entry in the history of this event.

It will be due, they say, to the lifting of the ban on exhibits from corn borer infested regions of the country. Exhibits from infested territory may be sent to the exposition this year after careful treatment under Government supervision at regional assembly points before they are sent to Chicago.

Australian Wheat on Way
They also assert that samples of

wheat from as far remote points of the globe as three of the important wheat producing states of Australia are en route to the 1931 show.

According to the management, the dead line on accepting entries for the individual livestock classes of the exposition will be November 1st; for the Grain and Hay Show November 10; and for that spectacular and highly practical side of the exposition, the earload lot classes of commercial cattle, sheep, and swine, November 21.

"Against The Wind" Big Hit Playing At Blackstone Theatre

The appearance of Mrs. Fiske in her new comedy by the young Chicago dramatist Carlos Drake, entitled "Against the Wind", is a dramatic event of more than mere passing comment. In the past decade Mrs. Fiske has contributed many magnificent characterizations to the archives of dramatic achievement; her mental discernment, supersensitive disposition and keen histrionic instinct has enabled her to visualize with absolute certainty, the character she creates. To enumerate these portrayals as well as to tabulate the diversity of plays presented, would occupy more space than is at the disposal of this department. Suffice it to say there is no woman upon the American stage who has done more to perpetuate the spoken drama, or with more fidelity to principle, upholds the finer traditions of the stage, than Mrs. Fiske, who inaugurated this season's engagement at the Blackstone Theatre Chicago, Monday night, the 26th.

In this new contribution of humorous intent and sparkling purpose, while there has not been any direct story of the comedy received, sufficient data has been secured to infer that the theme has to do with the daily activities, pastimes, romances and vagaries of an exclusive society community located on the north shore of Lake Michigan near Chicago, and that the author has taken actual personages to embroider and give life to his story; thus much hilarity, clever repartee and intimate disclosures may be expected.

As Kate Gordon, the society mentor who is the confidante adviser and arbiter in the hundred and one differences that occur during the evening, and who is the dynamo that generates the activities to enliven the conventionalities of this community—Mrs. Fiske is said to have a character that fits her from the tips of her immaculately manicured fingers to the highly polished toes of her French shoes; a character that is so brilliantly conceived and visualized with the skill of this consummate artist.

Mrs. Fiske always has a first class company, and upon this visit, there is no exception to her established rule. Charles Dalton of magnificent stature and voice; Alice John splendidly poised at all times; Reed Brown, jr., well known here; Hugh Rennie, also Virginia Venable, a Chicago girl of brilliant dramatic ability, and Elsie Keane, who have

WATCH FOR THE GRAND OPENING DATE.

TINLEY PARK

Mr. and Mrs. Ben Bettenhausen and family returned Wednesday from a trip to North Dakota, Minnesota and Charles City, Iowa. They report fine weather and a fine trip.

ZION LUTHERAN CHURCH

Rev. A. Buddenhagen, Pastor
In common with hundreds of thousands of Christian congregations all over the world, Zion Lutheran church will observe Reformation Sunday with special services at the church, November 1st.
English services at 10 a. m.
German services at 11 a. m.
Sunday school at 9 a. m.

TINLEY PARK M. E. CHURCHES

Theodore A. Loeppert, Minister
The worship service of the Tinley Park M. E. church on Sunday, November 1st will be held in the morning at 8 p. m. The Sunday school meets in the morning at 10:15. A hearty welcome to all.
The morning worship of the Tinley Park German M. E. will be in the English language and will begin at 10:45. The Sunday school meets at 9:45.
The Ladies Aid of the English M. E. church meets on Wednesday afternoon, November 4th in the home of Mrs. A. Panknin.

Clarence Bettenhausen left Saturday night on a trip to South Dakota. The P. T. A. are planning to hold a bunco in the new school Nov. 27. Wm. Funk and a number of other Tinley Park hunters leave for their duck hunting grounds near Beardstown, Ill.

The new Funk lunchroom is reporting a very nice business.

The Tinley football team played at Midlothian Sunday and were defeated 12 to 6.

While Philip Yunker was driving his Ford coupe on 159th street near Bachlor Grove Saturday night, the car suddenly caught fire and burned down to the pavement. No one was hurt.

Clarence Bettenhausen has landed a big dredging job in Kentucky and his dredge will be on the job for the next three months.

The Tinley Park Relief Association is carrying on its drive for relief with much activity. The Association needs the support of every resident.

Thruout the nation a relief drive for funds, clothing, provisions and fuel was started October 15th and the Tinley Relief Association invites your full co-operation to relieve distress in our community. Last winter, exclusive of the large amount of clothing which was distributed, an excess of \$800 was expended by the various groups in Tinley Park for relief work. The anticipated needs for the coming winter will be approximately \$1200. In order to

been with Mrs. Fiske upon former visits; Terry Carroll, a favorite player of screen and stage; Olive Reevesmith, the talented daughter of a popular father; Geo. A. Lessey, another local favorite, Olivia Anders, Isham Keith and others.

BELIEVE IT

OR NOT

Believe it or not, there is something new in radio. It is no longer necessary to leave your easy chair to tune in your favorite station or change the volume. Westinghouse has developed a new remote controlled radio that puts your controls right beside you wherever you are. Touch a button, change stations as easy as changing your mind. Adjust the volume as easy as turning the page of a book. Think of the convenience of having the choice of your six favorite stations right at your finger ends. Right beside your easy chair in a little bronze box, no larger than a small book.

Clarence Beagley who for the past five years has been serving the people of Orland Park and surrounding territory with the complete line of Westinghouse electrical appliances, lamps, ranges, farm lighting equipment and general wiring supplies is displaying this ultra modern radio in his store.

Secret of Big Light Beam

In huge electric searchlights that cast beams visible for 50 or 60 miles on clear nights, the carbons are not like those of ordinary arc lamps. Instead, the electrodes are cored carbons containing chemicals in the cores. The main source of light is a small body of gas contained in the crater at the end of the positive electrode. This crater of gas quadruples the strength of the beam.

A \$2 Dinner for 6

ON a crisp October day dinner is a very important function. The family attitude towards food is one of distinct interest. If the domestic exchequer has felt the strain of the times (and what one has not?), catering for a hungry household becomes a matter of careful calculation. In the following menu the calculation of cost and calories has been done expertly.

Roast Loin of Pork 99¢
Potatoes Roasted in Pan 8¢
Tomatoes and Corn with Chili 20¢
Cabbage and Apple Salad 20¢
Whole Wheat Muffins 15¢
Deep Dish Blackberry Pie 32¢
Demi-Tasse 5¢

Tomatoes and Corn with Chili:
Sauté one 8-ounce can whole

kernel corn in one tablespoon butter for five minutes; add one No. 2 can tomatoes, one-fourth teaspoon chili powder, salt and pepper; simmer for five minutes longer.

Deep Dish Blackberry Pie: Mix three tablespoons flour, six tablespoons sugar; add one No. 2 or three 8-ounce cans blackberries. Pour into buttered baking dish. Cover with thin sheet of pastry made of one cup flour, one-third cup shortening, one-half teaspoon salt and ice water. Trim edges, press onto edge of baking dish with prongs of fork. Cut several slits in middle to let steam escape. Bake for about ten minutes in hot — 450° — oven, then lower to 350°, and continue twenty-five minutes. Serve cold.

1—A SCOUT IS TRUSTWORTHY
A Scout's honor is to be trusted. If he were to violate his honor by telling a lie, or by cheating, or by not doing exactly a given task, when trusted on his honor, he may be directed to hand over his Scout Badge.

The Mokena Boy Scouts and their sponsors, W. E. McCleary, O. E. McGovney, John Balaz, Charles Erickson and Fred Yunker and the Scoutmaster, Rev. Mr. Cooke met in the gym of the Mokena public school on Saturday night. Following the business meeting games were played.

Erwin McGovney was appointed Scout Scribe and will write up the activities of the Scouts. At present the Scouts have one troop of eight boys. The Scouts extend an invitation to all boys over 12 years of Mokena and immediate vicinity to join the Mokena Boy Scouts.

Richard Sippel is the Senior leader and Wesley Cappel is the patrol leader.

Meetings are held every Saturday evening at 7:30 p. m. in the gym of the Mokena public school.

MOKENA

The Christ Paulson family will take possession of the lunchroom of Mrs. Elizabeth Bock November 1st. J. H. Nordsall moved Wednesday in his new home on the south side.

Nicholas Geuther who was recently injured when a tear gas bomb he was examining at the Joliet penitentiary where he is employed as guard, exploded, is recovering. One eye was quite badly hurt by the gas.

Mrs. Olive Stellwagen of Chicago visited with her parents, Mr. and Mrs. Charles Geuther the past week. Mrs. Edward Marti is on the sick list.

Miss Florence Dath spent the end of the week with her sisters, Mrs. Harry Werner and Mrs. James Egerton and family. Miss Dath returned recently from a trip to Europe.

Mrs. Carl Wolters is ill. Dinner guests at the William Jones home Sunday were: Mr. and Mrs. Louis Nelson and son, Russell, Lionel Nelson and Miss Weber of Chicago, Mr. and Mrs. John Balaz and son Harold.

The son of Mr. and Mrs. Joe Haden who has been ill, is much improved.

Conoco Winners To Be Announced

Announcement of winners in the \$10,000 cash prize contest sponsored by Continental Oil Company, for the best answers explaining "The Mystery of the Hidden Quart", will be made in an advertisement in next week's issue of The News-Bulletin.

The success of this advertising campaign, in which motorists were invited to compete for \$10,000 in prizes for the best answers to the question, "What becomes of the hidden quart of Conoco Germ Processed Motor Oil, and how does it benefit motorists?" has so far surpassed expectations that the winners cannot be announced as early as was anticipated.

A preliminary examination of all of the thousands of entries in the contest has been completed, and the judges are now making their final inspection of the entries, with the view to announcing the winners next week. The judges are: Dr. W. B. Bizzell, president of the University of Oklahoma; John A. Hunter, professor of mechanical engineering, University of Colorado, and Frank L. Martin, associate dean, school of journalism, University of Missouri.

Military Academy in Portland, Oregon and served in the war as an aviator. In the A. E. F. games held in France in 1919, he swept nearly all the events and was a star for the United States in the 1920 Olympics. After being demobilized he worked for several years as a sports writer on newspapers in California and Chicago.

Ross' duties will be to harmonize the interests of the two schools and the American Legion, which is sponsoring the game. Profits realized will be employed for the relief of former service men.

The contest will be played in an Army and Navy setting. The Cadet corps of the academies will parade thru downtown Chicago and on the field before the start of play. One of the most distinguished gatherings ever to see a football game in the middle west will be on hand.

Hunter Arrested At Orland Loses State Permit

Cleveland P. Grant, who on Sept. 26, while employed by the Field Museum, was arrested at the McGinnis Slough in Orland by State Game Warden Thanasulas for shooting after sunset, hunting without a license and shooting migratory game birds, has been notified to surrender his State permit for scientific specimen gathering.

In a letter dated Oct. 14th to Grant who lives at 5749 Woodlawn ave., Director of Conservation Ralph F. Bradford, instructed the scientist to turn his permit over to Game Warden Thanasulas at once. The permit authorized Grant to collect birds, nests, etc., for solely scientific purposes. The Federal authorities are moving now to revoke the U. S. Government permit of Grant on charges growing out of the case and a similar move is under way in the case of his companion Walter Weber of Evanston, commercial artist.

The fact the one man has lost his state license, due to violations of

the honor code therein, and the other will probably be a source of gratification to hundreds in this section including members of the Isaac Walton League, who are interested in clean sport in fish and game ends. Grant has made a special trip to Springfield upon receipt of the letter and has pleaded with Director Bradford to rescind the revocation order. Local conservation leaders, hearing of this, have hastened to assert their protests to Mr. Bradford on this move of the man who was morally overstepping the bounds of the permit.

tion work has been given much attention in this section. The drive opened officially in the county on October 15th. On that day Sherman S. Knox, Raymond Myrick and Ray Doctor visited a number of schools distributing the Relief Service flags and literature.

At the Orland Park school Rev. Wm. Gorey of the St. Michael church gave an address and Mrs. H. Adele Cooper, village clerk, in the absence of a mayor, read the proclamation each mayor has been requested to issue.

The following schools were visited. Mr. Knox and his two companions first mentioned: Orland Park, Yunker school on Wolf road, Christ Lutheran school, McCord School, Maharay School, Palos Park School, Powell school and the school at 95th and Dymell Springs. Mr. Knox made an address at each school. The service flags were raised by Mr. Knox and his aids at the Orland and Palos schools.

The service flags have a white background with a blue circle and five gold chevrons, the latter representing the 5 major organizations heading the Relief Work in Cook County namely The Associated Charities, Jewish and Catholic Charities, Salvation Army and the American Legion.

The Electric Association of Cook County met Thursday at Harvey to consider plans for holding an Electric Show in the near future. Roy G. Loebe and Clarence E. Beagley attended from here.

John Helenhouse who has been ill is improving nicely.

The next meeting of the Southwest Towns Chamber of Commerce will be held at Taylorville, Ill., on November 12th.

Dr. W. R. Schussler has gone on a business trip to Texas. He is expected back the end of the week.

The Purple Candle Restaurant under the new management of Mrs. F. Miller, is showing a good pickup in business. Chicken and steak dinners are much in demand, especially on Wednesday, Saturday nights and Sunday dinners.

MARLEY NEWS

The Sunday Evening club of the Marley community church will sponsor a special program next Sunday evening, November 1st, at 8 o'clock. The following musical program will be given under the direction of Miss Iva Gillett and Mr. Elmer Rowley.

Piano selection by Mrs. A. R. Wakeland; Hymn by the congregation; Ladies Trio The Misses Eileen Helen and Adele Jensen of Joliet; Violin Solo, Miss Hazel Gaines of Lockport; Male Quartette, Messrs. Elmer Rowley, Edward Sandbloom, August Lund and Arthur Sandbloom of Lockport and Trombone Solo by Gordon Grose of Joliet. Announcements, Miss Mary Francis Frazer, president of the club. A free will offering will be taken. A short talk on music by Rev. A. R. Wakeland of Marley.

Piano Solo, Miss Mildred Woodrich of Mokena.

Vocal Solo, Miss Eileen Jensen.

Vocal Music, Lockport Male Quartette.

Girls Trio, of Joliet.

Violin Solo, Miss Gaines.

Closing Prayer, Rev. A. R. Wakeland. The public is invited to attend and a full house is desired by the committee.

A Halloween Party will be held at the Wilber Francis home west of New Lenox, Saturday evening, October 31st, under the auspices of the Marley Sunday Evening Club. Ladies are requested to bring either do-nuts or sandwiches.

Mr. and Mrs. Walter Spiess and son Walter of Mokena, were Sunday guests at the home of Mr. and Mrs. E. D. Gillett.

Mr. and Mrs. Merwin Moore entertained at a family dinner Sunday at their home on Maple St. in honor of Mrs. Madge Storm and Jesse O. Marshall birthdays.

The Don C. Hall Co. Entertainment given at the Marley Church, last Friday evening, was well attended, in spite of the rainy weather, and the program was very much enjoyed by all present. The Marley Woman's Society wish to thank the Don C. Hall Co. for their kind co-operation.

The Entertainers will present another of their programs at the Marley Church, sometime during November. Watch this column for the date.

Mr. and Mrs. John F. Handorf and family attended a family gathering, Sunday at the home of the latter's father, Henry Beckworth Sr. in Worth, to help him celebrate his birthday.

Mrs. Jane Casson of Homer is visiting at the home of Mr. and Mrs. Edward Marshall.

Mrs. A. L. Heinz of South Haven, Mich. visited at the home of Mrs. Fred E. Blodgett, Saturday.

Mercolized Wax Keeps Skin Young

Get an ointment and use as directed. Fine particles of aged skin peel off until all defects such as pimples, liver spots, tan and freckles disappear. Skin is then soft and velvety. Your face looks years younger. Mercolized Wax brings out the hidden beauty of your skin. To remove wrinkles use one ounce Powdered Sakalite dissolved in one-half pint with kerosene. At drug stores.

Fertile Tracts Formed

by Overflow of Rivers

The behavior of rivers is a fascinating subject to study. The speed of a river will frequently be changed by the nature of the land through which it flows.

For example, a river will come tumbling down a mountain slope and then enter a flat plain. This causes a great change in the velocity of the river. As the river slows up upon the plain, it can no longer carry all the sediment which it has been bringing down the mountain side. Hence, it will deposit much of the sediment at the foot of the mountain where it enters the plain.

This deposit usually takes the form of a fan-shaped deposit like a section of a cone with its apex in the foot of the mountain. It is known to the geologist as an alluvial cone.

A river will also deposit much of its sediment when it meets with some obstruction which temporarily slows it up. These deposits are known as bars. They are not permanent. A bar will form for a time. Then some change in conditions will cause it to be swept away again while a new bar forms somewhere else.

Another type of deposit occurs where a river flows through a wide flat valley. During a flood season, the river will overflow its banks and spread out over the valley. But the outer reaches of the flood will not have a velocity like the central portion of the stream.

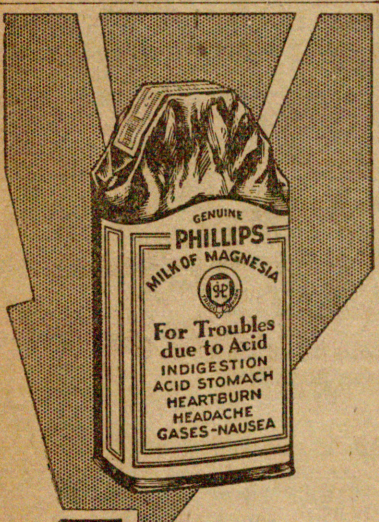

Consequently the sediment will be deposited there and after the flood recedes the valley will be covered with a thick layer of sediment. This is known as a flood plain. These flood plains are usually composed of very fine sediment. As a result, they usually form fertile tracts of land which are extremely valuable for agricultural purposes.

To Save Arrowhead Landmark

The Arrowhead, a natural formation like the head of an arrow, standing 500 feet high on a mountain slope in the San Bernardino National Forest in California, is to be preserved by the forest service of the United States Department of Agriculture. The landmark, which was an object of superstition to the Indians and a guidepost for early settlers, has been threatened with destruction, owing to erosion of the mountainside. Check dams will be created to halt the erosion, which in recent years has cut into the figure of the arrow severely.

Trial and Error

"How are those new bumpers?" "Fine; I bumped two cars already and never got a scratch."—Detroit News.

SOUR STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective yet harmless. It has been the standard antacid for 50 years. One spoonful will neutralize at once many times its volume in acid. It's the right way, the quick, pleasant and efficient way to kill all the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against acid-mouth.

Heart of the North

by William Byron Mowery

(WNU Service.)

Copyright by William Byron Mowery.

The author of HEART OF THE NORTH, whose stories of the great wilderness are sweeping the country, because of their authentic romance of the last great frontier, has known the forests since he was old enough to set a trap. As a boy in the Upper Peninsula of Michigan, and Ontario, he trapped, hunted, sometimes acted as a guide and tried several ventures in fur farming and training fox hounds and 'coon dogs.

William Byron Mowery.

My earliest memory, he says, "is of a bigger brother carrying me above his head while he broke the ice across a river to get an otter from a trap. I learned to shoot and trap before I could read and I shot a bear once when I had to prop up that heavy old occasional Winchester with a forked stub." But Mowery did learn to read and write—especially write. He acquired education so avidly and with such good effect that a few years ago he was drafted by one of the largest institutions of learning in the country—the University of Illinois—to be an instructor in English.

Every time he got a vacation he spent it in the North country, principally along the Mackenzie river from its headwaters clear down to the Arctic ocean. He became an authority on the forest and muskew wilderness. Finally the fascination lured him to drop everything else and devote himself to making literature of the region. His stories are thrilling in the highest degree and have the unique quality of combining great charm, authenticity and refreshing character studies with the thrills.

One of Mowery's happiest achievements is in the very real, but none the less interesting, manner in which he depicts the police service known as the Northwest Mounted. The hero of HEART OF THE NORTH is a sergeant of that service; a man of today, truly drawn, but of a courage and chivalry that might grace the pages of knight-errantry.

CHAPTER I

The Killers

Father Claverly, leaning against the rail of the Midnight Sun, suddenly straightened up, stiff with shock; and stared incredulously at the six men.

For moments he could not believe he actually was witnessing a robbery. Here in this Canadian Northland where outlawry was rare and futile, here on the mighty Mackenzie where river boats time and again carried unguarded cargoes of half a million in furs and gold, a brazen daylight attack upon a big steamer was simply unthinkable.

A few minutes ago the six men in a pair of birch-bark canoes had skirted out of the tributary river, the Big Alooska, and hailed the steamer as they were merely trappers or a trading party wanting passage up south. A ladder was innocently let down for them, and they had come aboard, taking a despicable advantage of the friendly, accommodating spirit extended from man to man in this North country.

Now, under the leadership of a hugh red-bearded fellow, they stood on a pile of deck cargo amidships, watching each way. With repeating rifles alert in their hands, they loomed ugly and menacing over the crowd.

Father Claverly, quickly recovering from his shock, stared sharply at the six men, trying to identify them. One was a 'breed; the other five were nondescript whites. All of them were unknown to him.

While he was wondering what their next move would be, a girl among the passengers suddenly cried out:

"Bandits! They're bandits! Oh-oo-oo!"

To half the people aboard the Midnight Sun the girl's cry was a first warning of the holdup. Whirling, the passengers stood transfixed, staring at the six vicious strangers who had them covered.

Fearful of bloodshed, Father Claverly glanced around at the crowd. Realizing that a fight would turn this deck into a shambles, he prayed that somehow, by quick thinking, he could avert a battle.

There were courageous men among those fifty on deck; but only one man had the quiet deadly courage to draw a long belt-gun against six rifles.

He was Jimmy Montgomery, mate of the steamer.

Crouched beside a bale of wolf-skins, Jimmy had been pointing out things ashore to his four-year-old daughter. At the cry he glanced up, saw the bandits, understood instantly; and his face hardened. He was Mounted-trained, Jimmy was—seven years with the scarlet-and-gold Maintainers of the Right. Shoving his baby girl behind the wolf peltry, he whispered, "Lie down, sweet; keep down, down," and rose to his feet.

His first bullet, fired from the hip, sang between two bandits and whanged into the pines beyond. His second knocked the floppy stetson from a bandit's head. His third was never fired. A Savage spoke out sharply. Jimmy grabbed at his breast, his revolver dropped to the boards, he swayed a moment, then sank down, shot cleanly through the heart.

Father Claverly heard a mutter arising from the crowd; heard the shuffling of feet, the half-hysterical sobbing of women, the snarling oaths of men. Out of the corner of his eye he saw men glancing at one another, waiting for one of their number to raise the long yell; and he realized that this ominous, swelling mutter was the prelude of a concerted rush.

The bandits realized it, too. It was

plain to Father Claverly that they had not bargained on a battle, and were cowering at the prospect of rifle talk. But there was no retreating now; they would be forced to fight. In a flashing thought he visioned this deck as it would be a few moments hence: the criminals, rifle-armed, shooting from cover of the cargo piles; the blood-spattered promenade, with women and children caught in that swath of death.

In the next instant Father Claverly saw how he might stop the slaughter.

Stepping forward from the rail, he uplifted his arm to draw the eyes and attention of the bandits. Oblivious to personal danger, thinking only of the innocent lives he might save, Father Claverly walked up closer, closer, till the criminals could have touched him with their guns. Either his calm mien or his black robe and hat had power over those rifles, for the muzzles swerved aside from him.

"Don't shoot again," he bade quietly, as one with authority. "You have killed a man. You have murdered."

The dark-faced bandit who had fired the shot flinched before that steady accusing gaze, and turned his eyes away from Father Claverly's.

"I was compelled to keep them. He should not tried to interfere with us." Father Claverly scorned so flimsy a justification of a brutal killing. Turning away from the bandits, he faced the crowd. Steady, clear, his voice rose:

"Men! Don't stir! Don't make a shambles of this deck. There's nothing aboard this boat as precious as

He Cocked His Weapon With an Audible Snick and Pointed It at Her Breast.

the lives that would be lost. Let them take what they want and go peacefully."

His appeal fell on deaf ears. A slow vengeful wrath was gathering. . . . Jimmy Montgomery, known and loved all along the Mackenzie, lay murdered there on the deck. . . . Those killers were going to pay for that barbarous crime.

The snarling oaths rose again; the muttering swelled audibly; hands crept down and closed upon belt-gun butts. . . .

It was the bandit leader who stopped the rush, who stopped it dead short at one stroke. Swinging his gun at a young schoolmistress, Margaret Fournier, one of the passengers, he ordered her, "Step up here, sister; step up close;" and when she obeyed him, wild-eyed with terror, he cocked his weapon with an audible snick and pointed it at her breast.

His voice rose so that the whole deck heard.

"Now shoot! You can't get me afore I can get her! First move I see made with a gun, I'll give her what that gent there on the boards just got!"

Without turning or swerving his rifle from the girl, he bade two of his men:

"Andre, you and John go below. Git the dust. Sort out some furs, too, good furs, six or seven hundred pounds—martens, mink, dark fox. You know what's light and valuable."

The two bandits stepped down and seized one of the crew and made him take them down the companionway. Coming up presently, they lowered their booty into the two birchbark canoes that bobbed against the side of the steamer.

As though every man aboard realized that the bandits held the whip-hand, that no one dared stir, that retribution must come from elsewhere, a whisper started, spontaneously, from a dozen points at once:

"Baker! Alan Baker! Sergt. Alan Baker!"

This whisper went from neighbor to neighbor, from group to group; and men smiled grimly as they heard this mere mention of a man's name:

"Baker! Sergt. Alan Baker—at Fort Endurance."

Another of the bandits, protected by that rifle pointing at Margaret Fournier's breast, walked boldly out among the passengers; and securing a fire ax, he went from boat to boat on deck, smashing their trail sides so that there could be no pursuit, no retribution, if the two canoes could only get out of rifle range of the steamer.

Seeing now that the threat to Margaret Fournier's life had checked all thought of a rush, Father Claverly

walked toward the stack of wolf skins, crossing himself as he stepped over the dark stream of blood that trickled slowly toward a scupper. Bending, he picked up the little Montgomery girl, who was looking with wide, uncomprehending eyes at the body of her father. Mercifully taking her away from there, he walked over to the rail, holding the little tot so that she could not look back.

The man beside him said in a low voice: "Look at that devil smashing the boats! They must have planned that 'caution beforehand, so we couldn't chase 'em. But don't that big red-haired devil know we'll be splattering their canoes afore they get ten rods gone? G—d!—what we'll do to them six!"

The whisper spread. . . . "Wait! Wait! they start away. . . ." Men folded their arms, and watched quietly, biding their moment of vengeance.

And then, when the canoes were loaded with their booty, the red-bearded leader played his last and best card. Flipping his gun at Margaret Fournier, he ordered her:

"Git down into one of them canoes, sister. We're going to carry you a couple miles up this Big Alooska here and set you off on a bar, see? We ain't meaning to harm you at all. Just start ankling over and climbing down into a boat. . . . That's right; that's a sensible girl. . . ."

He raised his voice so that every one could hear; he spoke to Margaret Fournier, but his words were intended for the men aboard:

"Some of these fellows is figuring to shoot h—l out of us afore we can git clean gone, see? But they'd better think twice about that. And I guess they will. First hunk of lead comes whistling our direction, you'll git a bullet squar' atween them pretty eyes, sister!"

CHAPTER II

A Northern Man

At Fort Endurance, in his big three-room cabin overlooking the rest of the post, Alan Baker was changing uniform and making himself regimental again, after a four-day patrol to a camp of drunken Hares.

Just turned thirty, tall and lanky and powerful of body, Baker had shaken off the last vestige of an unhappy boyhood and his three harrowing years Across. He was in the prime of a virile and hardened manhood. Coming here to Endurance as a corporal seven years ago, with Jimmy Montgomery and Curt Spaulding as his constable, he had speedily showed his worth as a "northern man" and a detachment leader able to cope with frontier problems. To him it was like coming into his own. In his boyhood he had daydreamed of hunting big game; and here, at this post just beneath the Arctic circle, these daydreams had been realized, though in a strange way. For here he had hunted the biggest of big game—human game that had intelligence to match against his; that carried a rifle in its hands, and wore a belt-gun, and must be captured alive, at risk of his own life.

During the years that he had been officer commanding here, he had built up an enviable reputation. With his gradually increasing pack of northern men he had successfully brought his big territory through Indian troubles and epidemics, and had smashed those lawless elements that came in with the oil-prospecting rushes farther south.

With a record like that and with Superintendent Williamson as his friend, Alan had expected to get his commission last fall when the post was raised to an inspectorate. No one in all the Three Rivers country doubted that Baker would be the chosen man. To them, to Alan, the blow came unexpectedly. A political appointee named Haskell, a newcomer to the Force, a worse than raw newcomer to the North, got the inspectorship and command of this coveted detachment.

In these last months, Alan had been very thoughtful about his future. Here, at thirty, he found himself in a blind alley, a non-com on meager pay, with no hope of promotion. He had turned down the opportunity of going into a big mining company that was prospecting by planes through the Athabasca country. He had refused half a dozen offers that held prospect of advancement and fine money. And then the Force that he had given such loyalty to had betrayed him. Worst of all, most stinging of all, he was forced to manage this territory still, straightening out the mistakes and enduring the arrogance of the man who had got the place he himself had earned.

(TO BE CONTINUED.)

Fortune in Croquet Box

A manuscript worth hundreds of dollars a page was found in the lumber room of an English castle.

One summer's day the guests of Lord Talbot de Malahide decided to play croquet and sent servants to fetch the mallets and hoops from their box in an old lumber room. The servants opened a box and, instead of mallets, found a mass of musty crumbling papers yellow with age.

These proved to be the manuscript writings of James Boswell, the great-grandfather of Lord Talbot, and among them were 107 pages of his famous Life of Johnson. Only 16 pages of this manuscript had been found before, and their owner was offered \$75,000 for them.

Improved Uniform International

Sunday School Lesson

(By REV. P. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago.)
(©, 1931, Western Newspaper Union.)

Lesson for November 1

WORLD'S TEMPERANCE SUNDAY

GOLDEN TEXT—And be not drunk with wine, wherein is excess; but be filled with the Spirit.
LESSON TEXT—Gal. 5:13-26.
PRIMARY TOPIC—The Danger of Strong Drink.

JUNIOR TOPIC—The Peril of Strong Drink.
INTERMEDIATE AND SENIOR TOPIC—Reasons for Total Abstinence.
YOUNG PEOPLE AND ADULT TOPIC—The Progress of Temperance Reform.

This lesson is taken from the portion of the Epistle to the Galatians which has to do with the application of the doctrine of justification by faith. By faith the believer is linked to Jesus Christ. As a result of this union with Christ, the believer experiences a new birth, and thereafter lives a new life. The divine way of freeing the world from the curse of intemperance is to secure the regeneration of the individual.

I. Christian Freedom (vv. 13-15).
1. It is not an occasion to the flesh (v. 13). Liberty is not license. The notion that when one is free from the law he is free from restraint is wickedly erroneous. License of the flesh means not merely the indulgence of the flesh in actual material sins, but in the expression of a self-centered life in bickerings, etc. (v. 15).

2. It is by love serving one another (v. 13). Freedom from the Mosaic law means submission to the law of love. Love thus becomes the fulfillment of the law. (v. 14).

II. Walking in the Spirit (vv. 16-18).
This discloses the secret of how a life of love and service to another can be lived. Walking in the Spirit results in victory over the flesh (vv. 16, 17). By "the flesh" is meant the corrupt nature of man expressing itself in the realm of sense and self. When the Christian chooses the evil, the Holy Spirit opposes and when he chooses the good, the flesh opposes.

III. The Works of the Flesh (vv. 19-21).

The one who chooses to live according to the desires of his natural heart will be practicing the following sins:
1. Sensuality (v. 19). The sins enumerated here are practiced in the sphere of the body and are:

a. Fornication (the word "adultery" is omitted from the best manuscripts). Fornication includes all sexual sins in the married and unmarried state.
b. Uncleanness, which includes all sensual sins, open or secret, in thought or deed.
c. Lasciviousness—wanton indulgences in the shameful practices of the flesh.

2. Irreligion (v. 20). These acts take place in the realm of the spirit and are:

a. Idolatry, which means the worshiping of idols.
b. Witchcraft or sorcery—all dealing with the occult such as magical arts, spiritism, necromancy, etc.
c. Sins of temper (vv. 20, 21). These take place in the sphere of the mind and are:
a. Hatred. b. Variance, which means strife and contention. c. Emulations, which expresses itself in jealousy. d. Wrath—bursts of passion. e. Seditions—factions in the state. f. Heresies—factions in the church. g. Envyings. h. Murders.

a. Sins of excess (v. 21).
a. Drunkenness—indulgence in intoxicating liquors.
b. Revelings—acts of dissipation, under the influence of intoxicants.

Those who are under the sway of the flesh, who practice such sins, shall be excluded from the kingdom of God (I Cor. 6:10).

IV. The Fruit of the Spirit (vv. 22-24).

The Holy Spirit, who is the source of all life indwelling the believer, will bear the following fruits:

1. Love to God and men.
2. Joy—glad-heartedness because of what God has done.
3. Peace with God and men.
4. Long suffering—taking insult and injury without murmur.
5. Gentleness—kindness to others.
6. Goodness—being good and doing good to others.
7. Faith—believing God and committing all things to him.
8. Meekness—submission to God, the spirit of humility before him.
9. Temperance—self-control in all things. The one who is thus ruled by the Holy Spirit will totally abstain from all intoxicants and do his best to keep his fellows from its destructive power.

Good Preaching

Good preaching is good teaching—whether vice versa or not.—Continued.

Duty

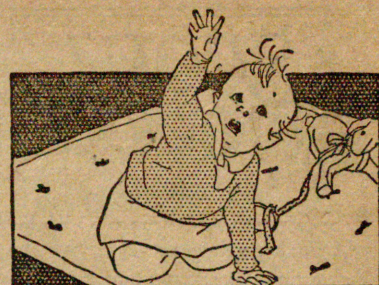

There is nothing laid down as a duty, but grace is promised to enable us to perform it.—Rowland Hill.

God Gives Us Aid

God gives us always strength enough and sense enough for what he wants us to do.—Ruskin.

All for Christ

I gave up all for Christ, and what have I found? I have found everything in him.—John Calvin.

BABY FRETFUL, RESTLESS?

Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is so mild and gentle you can give it to a young infant to relieve colic. Yet it is as effective for older children. Castoria's regulative help will bring relaxed comfort and restful sleep to your baby. Keep a bottle on hand. Genuine Castoria always has the name:

Cast H. Fletcher
CASTORIA
CHILDREN CRY FOR IT

A Brave Man's Speech

Samuel H. Church, the head of the new Liberal party, said in New York the other day:

"To belong to our new party will take courage. But nothing can be done without courage. Remember what Pompey the Great said when he wanted to sail his grain ships to starving Rome and the sailors were afraid to raise anchor on account of the terrible storm.

"It is necessary to go," said Pompey. "It is not necessary to live."

3 RULES big help to BOWELS

What a joy to have the bowels move like clockwork, every day! It's easy, if you mind these simple rules of a famous old doctor:

1. Drink a big tumblerful of water before breakfast, and several times a day.
2. Get plenty of outdoor exercise without unduly fatiguing yourself.
3. Try for a bowel movement at exactly the same hour every day.

Everyone's bowels need help at times, but the thing to use is Dr. Caldwell's Syrup Pepsin. You'll get a thorough cleaning-out, and it won't leave your insides weak and watery. This family doctor's prescription is just fresh laxative herbs, pure pepsin, and other helpful ingredients that couldn't hurt a child. But how it wakes up those lazy bowels! How good you feel with your system rid of all that poisonous waste matter.

DR. W. B. CALDWELL'S
SYRUP PEPSIN
A Doctor's Family Laxative

"No Sale"

He—What would I have to give you for just one little kiss? She—Chloroform.

Suited Him

"Curves are coming back, Joe." "I'm glad to hear it. I never cared for oblong women."

Kills Pain and Heals
zmo OIL

It kills pain while it heals; because it penetrates into the wound.

If you have Pain in Back, Cold in Head, Cough, Sore Throat, Earache, Piles or know of a wound on man or beast that will not heal, try ZMO-OIL.

35¢ at Drug Stores

If you have never used ZMO-OIL we will gladly mail you a free sample bottle. Write M. R. ZAEGLER & CO. 631 New York Ave. SHEBOYGAN, WIS.

W. N. U., CHICAGO, NO. 43-1931.

At a recent meeting of District 65, I. O. O. F., the following officers were elected: Walter Rutherford, Springfield, president; Frank Drury, Sr., Springfield, vice president; Howard Stanton, Loami, secretary; George Ritter, Springfield, treasurer.

Attorney General Oscar E. Carlstrom recently advised Director H. H. Cleveland of the state department of public works against the continuation of state work on contracts let under the prevailing rate of wage law. This law was declared unconstitutional by Circuit Judge Charles G. Briggie and is now awaiting consideration in the State Supreme court. Attorney General Carlstrom has requested that the Supreme court take up the appeal at the earliest possible moment.

Discovery that rats and mice are subject to typhoid fever has been made by the state health department. Dr. Lloyd Arnold, professor of bacteriology and preventive medicine at the state university, directed the research work. Dr. Andy Hall, director, suggests the possibility of human infection from the diseased rodents.

Daniel Chester French, internationally famous sculptor, died at Stockton, Mass., September 7. His work is represented by two famous statues of Abraham Lincoln. These are to be seen in Springfield at the rededicated tomb of the great emancipator.

Motoring in Illinois may be expected to be unusually heavy during the fall season according to a report of the tourists' division of the Illinois Chamber of Commerce. The Illinois Tourist Guide has acquainted thousands of people with the scenic spots of Illinois and these will be visited during the days of autumn when all nature is full of color.

Charles Crowder of Charleston was elected great sachem of the Improved Order of Redmen at the annual meeting. Springfield was chosen as the convention city for 1932.

A meeting of District Thirteen of the Illinois Congress of Parents and Teachers was held in Jacksonville on October 9, as was also a meeting of District Twelve in Taylorville on October 14. Other meetings planned are: District Seventeen, Marion, October 16; District Two, Marengo, October 20; District Sixteen, Grayville, October 23.

Gov. Louis L. Emmerson has authorized a group of officials connected with the state penal institutions to attend the American Prison congress at Baltimore, October 16-23. The group will include Col. Frank D. Whipp, superintendent of prisons, and wardens of the different prisons and reformatories.

Insurance business in Illinois is recording progress according to a statement of Harry W. Hanson, superintendent of the division of insurance in the state department of trade and commerce. There are now 1,387 insurance companies transacting business in Illinois with assets that aggregate many billions of dollars.

Stuart E. Pierson, director of the state department of agriculture, observes that low-priced grain and forage crops that go to waste suggest a revival of horse breeding as a timely plan to cut the costs of farm power and to reduce the crop surplus.

Dr. Charles F. Jarmon, Springfield, has been appointed chief of the division of social hygiene in the state department of public health.

The Illinois Commerce commission recently granted a certificate to the Tri-State Bus company to operate passenger coaches between Chicago and East St. Louis on routes 4, 11 and 150.

Greater safety in operation of freight trains in Illinois is the aim of an order recently issued by the Illinois Commerce commission. Under this new ruling, all Illinois railroads are prohibited after January 1, 1932, from placing a locomotive at the rear of a caboose to push trains or help them gain speed, unless the underframe of the caboose is of steel construction or of construction equal to the strength of an 80,000-pound capacity box car.

In order to improve the efficiency of the guards in the state's penal institutions, physical examinations of all guards have been ordered by Director Rodney H. Brandon of the department of public welfare, and Col. Frank D. Whipp, superintendent of prisons.

On October 7 a meeting of the commission appointed by Gov. Louis L. Emmerson to investigate reported gasoline tax evasions was held in Chicago where information relative to reported evasions was presented.

A recent report of R. S. Jones, field secretary of the Illinois Chamber of Commerce, shows that industrial expansion in southern Illinois has made a great growth since 1914 as there are but few cities which cannot boast of at least one or more flourishing industries.

Attorney General Oscar E. Carlstrom has advised Secretary of State William J. Stratton that all trucks, even though they be operated only during the daytime, should carry lights and reflectors as required by the new law which became effective October 1.

Gov. Louis L. Emmerson has announced the appointment of Dr. Preston Bradley as a member of the Illinois state normal school board. Doctor Bradley is the founder of the People's church in Chicago. He will complete the unexpired term of Ernest E. Cole, deceased.

The state pardon board went into session on October 12 to give attention to one of the heaviest dockets in its history. More than one hundred petitions were to be considered including those of sixty-three murderers.

On October 15 one of the largest classes in the state's history was admitted to the bar. The class numbered about 385.

Memorial services for the late Justice William M. Farmer were held by the Illinois Supreme court on October 15. The five living ex-justices were present at the services. They are: Floyd E. Thompson, Rock Island; George A. Cooke, Chicago; Paul Samuel, Jacksonville; C. C. Craig, Galesburg; Albert C. Watson, Mt. Vernon.

The total road construction in Illinois this year—all done with money supplied by the state—will be between 1,350 and 1,400 miles, according to a statement made by Gov. Louis L. Emmerson in his address at the dedication of the Blackburn bridge.

On account of the 35 per cent overcrowded condition of the state penal farm at Vandalia, Director Rodney H. Brandon of the department of public welfare and Col. Frank D. Whipp, superintendent of prisons, have urged judges of the county and circuit courts to refrain from committing misdemeanants to the institution until its population has been reduced. The population has increased 275 in two years.

The Illinois Supreme court has ruled that an employer cannot bar his employees from assigning wages without his consent.

Gov. Louis L. Emmerson recently stated that as soon as the revenue commission agrees on legislation to remedy the state's taxing ills, he will issue a call for a special session of the legislature to consider the report.

MacMurray college (Illinois Woman's college), Jacksonville, reports an enrollment of 418 which is fully equal to that of last year. Numerous changes and improvements were made in the college plant during the summer.

The state department of agriculture advises that all young trees with rough roots or crown gall should be discarded when planting young orchards. Young trees with smooth developed roots will grow more rapidly than similar stock that shows deformities.

In a survey which included nine of the largest cities in Illinois it was found that out of 1,820,384 gainful workers only 162,815 are definitely out of work. This does not include 24,987 additional workers who were temporarily laid off. The research was made by the Illinois Chamber of Commerce.

Stuart E. Pierson, director of agriculture, has received information that entries for the 1931-32 egg-laying contest, to be conducted by the state department of agriculture at Quincy, Kankakee and Murphysboro, indicate a capacity enrollment at all of the experimental plants. Entries come from as far East as Mt. Pelier, Vt., and from the Pacific coast and from the Canadian border to the Gulf. Southern Illinois poultry breeders are well represented in the Murphysboro unit.

Gov. Louis L. Emmerson has received information from the state department of agriculture that the eleventh year of the bovine tuberculosis eradication program in Illinois has revealed the lowest percentage of disease on record. During the last year 1,332,327 cattle were tested of which 18,972 specimens reacted. This is a low percentage record of 1.42 per cent. The number of cattle tested exceeds the former record by almost a quarter of a million. The cost of conducting this complete service was reduced during the last year from 61 cents to 50 cents per animal tested.

According to a report from the state department of public health, conditions are distinctly more favorable than at this time last year. Of the eleven principal epidemic diseases, there were only 532 cases reported during the week ending October 3. This was a decline of 25 per cent when compared with the same period of 1930.

The vacancy created on the appellate bench by the election of Justice Norman L. Jones to the Supreme court, has been filled by the appointment of Circuit Judge James S. Baldwin of Decatur. Judge Baldwin will sit on the court at Ottawa in addition to his Circuit court duties.

Wayne Hummer, chairman of the state activities committees of the governor's committee on unemployment relief, reports that about \$5,820,000 will be needed for relief purposes in downstate Illinois this winter.

Denver Boy is a Winner

Every mother realizes how important it is to teach children good habits of conduct but many of them fail to realize the importance of teaching their children good bowel habits until the poisons from decaying waste held too long in the system have begun to affect the child's health.

Watch your child and at the first sign of constipation, give him a little California Fig Syrup. Children love its rich, fruity taste and it quickly drives away those distressing ailments, such as headaches, bad breath, coated tongue, biliousness, feverishness, fretfulness, etc. It gives them a hearty appetite, regulates their stomach and bowels and gives tone and strength to these organs so they continue to act normally, of their own accord. For over fifty years, leading physicians have prescribed it for half-sick, bilious, constipated children. More than 4 million bottles used a year shows how mothers depend on it.

Mrs. C. G. Wilcox, 3855 1/2 Wolf St., Denver, Colorado, says: "My son, Jackie, is a prize winner for health, now, but we had a lot of trouble with him before we found his trouble was constipation and began giving him California Fig Syrup. It fixed him up quick, gave him a good appetite, made him sleep fine and he's been gaining in weight right along since the first few days, taking it."

To avoid inferior imitations of California Fig Syrup, always look for the word "California" on the carton.

Boss Yourself

Learn first to be your own manager. No one can be trusted with leadership until he has learned to discipline himself. Shun shiftlessness, greed, selfishness. It is difficult to keep from the pinnacle of success the man who is master of himself.—Grit.

Indiana Tree Planter Takes Long Look Ahead

A friend in the Middle West who is enough of a philosopher to take a long-distance view in matters financial writes us:

"I am happy to advise you that my tree planting experiment out in Indiana continues to have every prospect of ultimate success. I have now planted about 225,000 trees in two years, and, under the Indiana law, it is all exempt from taxation except on the valuation of \$1 per acre. I expect to put in about 2,000,000 trees and then leave them in trust for my grandchildren. The cost of doing this will not be in excess of \$30,000 and in about seventy-five years they will be worth approximately \$2,000,000, as I am planting only trees that will have cabinet wood value, such as black walnut, poplar, spruce and wild cherry. I will get my reward out of this in the pleasure that I will have in seeing my trees grow and in the hunting and fishing I will have at my lodge."—Commerce and Finance.

It Hardly Seems Possible

It is hard to realize the speed with which the germs responsible for sore throats and coughs can multiply, once they get a start in the delicate tissues. From a few to a million may be a matter of but a few hours. But you can always stop them short with a few applications of B. & M., The Penetrating Germicide. It is always dependable as a destroyer of the bacteria which do so much damage in the throat and lungs. Easy to apply and quick in action, it is a boon to people who are easily susceptible to such infections—one thing which should always be in the medicine chest ready for emergencies. Your druggist should have it. If not, send us his name and \$1.25 for full-size bottle, postpaid. Helpful booklet free. F. E. Rollins Co., 53 Beverly St., Boston, Mass. (Adv.)

You are urged to save money; but the ballyhoo urging you to spend it is louder.

When You CAN'T QUIT

Fatigue is the signal to rest. Obey it if you can. When you can't, keep cool and carry-on in comfort.

Bayer Aspirin was meant for just such times, for it insures your comfort. Freedom from those pains that nag at nerves and wear you down. One tablet will block that threatening headache while it is still just a threat. Take two or three tablets when you've caught a cold, and that's usually the end of it.

Carry Bayer Aspirin when you travel. Have some at home and keep some at the office. Like an efficient secretary, it will often "save the day" and spare you many uncomfortable, unproductive hours. Perfectly harmless, so keep it handy. Keep it in mind, and use it. No man of affairs can afford to ignore the score and more of uses explained in the proven directions. From a grumbling tooth to those rheumatic pains which seem almost to bend the bones, Bayer Aspirin is ready with its quick relief—and always works. Neuralgia. Neuritis. Any nagging, needless pain.

Precarious Enterprise

"What happens to a man who carries water on both shoulders?" asked the youth who is learning politics. "Well," replied Senator Sorghum, "I hate to use slang. But as a rule he gets soaked."

You Can't Tell

"Good-night, mother." "Daughter, are you coming in or going out?"—Exchange. When in doubt as to what to say suppress your thoughts.

Stronger · Tougher · Safer

THE patented construction features, explained here, make Firestone Tires stronger, tougher and safer. You get these extra values only in Firestone Tires—but you pay no more for them because of Firestone economies in buying, manufacturing and distributing.

We do not ask you to just take our word for these extra values. We invite and urge you to go to the Firestone Service Store or Service Dealer in your community—compare sections cut from Firestone Gum-Dipped Tires and special brand mail order tires and others. Check them for yourself. You be the judge.

Drive in today!

GUM-DIPPED CORDS

Every cord in Firestone Tires is Gum-Dipped. This patented extra process penetrates every cord—coats every fiber with pure liquid rubber. Gum-Dipping increases the flexing life of the cords—minimizes internal friction and heat—increases the strength of the tire body—and gives longer tire life. Only Firestone Gum-Dipped Tires give this Extra Value.

TWO EXTRA CORD PLYS UNDER THE TREAD

This patented construction of Two Extra Cord Plys under the Tread in Firestone Tires insures a stronger bond between Tread and Cord Body and greater protection against Punctures and Blowouts. This new, improved "all cord" construction antiquates the old-fashioned cross-woven fabric construction used by others.

Firestone Give You	4-75-19 Tire	4-50-21 Tire
More Weight, pounds	18.00	17.80
More Thickness, inches	.658	.605
More Non-Skid Depth, inches	.281	.250
More Plies Under Tread	6	5
Same Width, inches	5.20	5.20
Same Price	\$6.65	\$6.65

*A "Special Brand" tire is made by a manufacturer for distributors such as mail order houses, oil companies and others, under a name that does not identify the tire manufacturer to the public, usually because he builds his "best quality" tires under his own name. Firestone puts his name on EVERY tire he makes.

Double Guarantee—Every tire manufactured by Firestone bears the name "FIRESTONE" and carries Firestone's unlimited guarantee and that of our 25,000 Service Dealers and Service Stores. You are doubly protected.

MOKENA

Miss Deletta Werner, the eldest
 daughter of Edward Werner, enter-
 tained six of her playmates on her
 sixth birthday at a six o'clock sup-
 per last Monday evening, Oct. 26.

Tinley Ready For

Fall Festival

(Continued from first page)
 The votes are counted and the
 queen chosen, she will be escorted
 to the Saenger Hall where Mayor
 William Mohr will place the crown
 on her head and escort her to the
 throne.

Pages will be in waiting and a
 pageant will be a feature in con-
 nection with the crowning event of
 Miss Tinley Park.

The Queen will be presented with
 gifts from the business men, chief
 of which will be a black chest 54
 inches long, 19 inches wide, 24
 inches deep.

Prizes will be awarded for the
 best three ears of corn brought to
 town, prize for best waltz, prize
 for best pet in parade for kiddies,
 prize for largest pumpkin brought
 to town and prizes for best pump-
 kin Jack-O-Lantern made by chil-
 dren to be set up downtown any
 time before 7 p. m.

Dancing at the Saenger Hall fol-
 lows the crowning and other fea-
 tures of the program beginning at
 9:15 p. m.

Make this a big night and come
 to Tinley Park to enjoy yourself.
 Proceeds of the affair will go to
 the Tinley P. T. A. Bring all your
 corn and pumpkins for prize entry
 to Saenger Hall with your name at-
 tached.

There will be a prize for the best
 dance caller. A good time for old
 and young. Tony Kososki's orches-
 tra will furnish the music.

Plans are also being made to en-
 gage the Orland Park Community
 Band for the evening.

A large number of Chicago peo-
 ple have been invited and are ex-
 pected to attend. C. Sander will be
 master of ceremonies.

Mokena Watermains May Be Extended

The matter of supplying the vil-
 lage of Mokena with a more ade-
 quate water system came up for dis-
 cussion before the Mokena council
 Wednesday night. A letter was
 read from the state highway de-
 partment denying a permit to Mil-
 ton Krapp to place a private water
 pipe line from the village mains to
 his property on Wolf Road as the
 line would run under the should-
 ers of the highway. The state will
 grant a permit for the extension of
 the village water mains along Wolf
 Road, however.

There is quite a demand for wa-
 ter in the village, consequently the
 matter was left to a committee
 consisting of Mayor John C. Niel-
 sen, and trustees Ona E. McGovney
 and Milton Krapp. The property
 owners will be interviewed and
 those who desire to have the village
 water extended along their streets
 will be asked to sign a petition to
 that effect.

Mr. Cather, village engineer
 stated that the cost of the proposed
 improvement would have to be met
 with a bond issue and also by spe-
 cial assessment as the assessed val-
 uation of Mokena will only permit
 the raising of \$3500. Soon as the
 property owners have all signified
 their willingness to go ahead with
 the project, then the plans for the
 water improvement will be consid-
 ered. The estimated cost is \$3.00
 per front foot, this meaning both
 sides of the street.

Tinley Lion News

The Tinley Lions Club held an
 interesting meeting Monday night.
 The club had a number of visitors
 present and hopes that they will be-
 come members.

Three of the past presidents of the
 Club gave interesting addresses in
 which they reviewed the many ac-
 tivities the Lions have sponsored
 and what they have done for the
 community. The past presidents are:
 H. C. Vogt, Paul Rauhoff and Fred
 Goebel.

Among the things the Lions have
 done for Tinley are the naming and
 numbering of the streets, installing
 public drinking fountains, passing of
 zoning ordinance by village board
 thru efforts of the Lions, establish-
 ment of a bowling league, and last
 and largest of all accomplishments
 the bringing about of the erection
 of the fine new Tinley Park public
 school.

MOKENA

NOTICE

The Mokena Community Band
 is called for practise to-night at 7:00
 o'clock instead of 8:00 o'clock, on
 account of Halloween parties.

R. I. FREIGHT

ROBBED NEAR

MOKENA TUES.

Another Rock Island freight
 train was robbed Tuesday night
 west of Mokena, when a quantity of
 merchandise was tossed out near
 the Hickory Creek, where it was
 said a car was in waiting to pick up
 the stolen goods.

The train was made up in Blue
 Island. The robbers ride the
 freights, and when the train arrives
 at the spot where they wish to toss
 out the merchandise, they fasten a
 rope ladder from the roof of the
 car and crawl down to the car
 door, break the seal and get in and
 heave out the goods. The exact
 amount of the loot taken Tuesday
 night has not been learned. The
 railroad detectives are working on
 the case.

Orland P. T. A. Plans

Interesting Meeting

Mrs. Louis Arnold, chairman of
 the Orland Park P. T. A. program
 committee is mapping out an inter-
 esting program for the next meet-
 ing to be held November 12th.

Among the features will be reci-
 tations, music by the toy orchestra,
 songs and a short program by the
 pupils in the room of Miss Lucille
 Schmadeke.

The P. T. A. is planning to pre-
 sent three one act plays during
 December.

Mokena Streets

To Be Improved

Mokena is making a start in get-
 ting its village streets paved. At the
 council meeting Wednesday night,
 the board voted to gravel second
 street from Wolf Road east to Mo-
 kena street and if the expense is not
 too much for the treasury, the im-
 provement of this road will be con-
 tinued on to Division street to the
 southwest of the Mokena school
 ground.

Mokena Man In

Race For Congress On Wet Ticket

(Continued from first page)
 The expressed sentiment of the
 Electorate is for a repeal of the ex-
 isting Legislative enactments, the
 Volstead Law and if possible the
 18th amendment.

On my record while a member of
 the Wisconsin Legislature, my in-
 tent and purpose as publicly and
 privately expressed, I am prepared
 to Represent the People in accord-
 ance with their expressed desires.

These obnoxious and absolutely
 unenforceable measures must be voted
 against in April and in November,
 1932, in the selection of Represent-
 atives who will vote against them
 on the floor of the National Congress
 in the following session.

A full text of my Platform will
 be published within the next few
 weeks.

For the present my purpose is to
 prevent as far as it is within my
 power, a further rule of ruin by the
 allied forces of "under cover"
 agents, who have sneaked in to pub-
 lic office through "slick", Political
 connivance and deceptive manouv-
 ers to betray the people into the
 clutches of the bigots, personally
 profiting from the so called "Dry
 Enforcement" activities, who have
 "peddled" our "Birthright" of Lib-
 erty for the damnable "mess of pot-
 tage" we are "fed up" on.
 Oct. 26, 1931. Don C. Hall.

New Lenox Lunchroom

Robbed of \$93

The Garman Lunch room in New
 Lenox, located on the Lincoln High-
 way in the village, was held-up
 early Monday morning and robbed
 of all the Sunday receipts, totalling
 \$97. Three bandits held-up the
 proprietor and fled. Later they held
 up several cars near the Cherry
 Hill Country Club west of New
 Lenox.

Mokena Woman Asks

Protection From Her

Former Husband

(Continued from first page)
 Mrs. Lash, next door neighbors. He
 is also charged with insulting Judge
 John F. Schultz inviting him to
 physical combat and calling him vile
 names.

Mrs. Steele stated she was help-
 less and defenseless and needed
 protection from Lauffer. She stated
 that the court order permitted
 Lauffer to visit his children on Sun-
 day afternoons, but did not allow
 him to seize them and make them
 go with him against their will.

According to Mrs. Steele, Lauffer
 is guilty of contempt of court.
 She asked the village board to pre-
 sent the matter to Judge Hill and
 to ask him to investigate the case
 and put a stop to Lauffer's antics
 and disturbance of the peace.

For a number of weeks the
 sheriff's office has sent two deputy
 sheriffs here every Sunday after-
 noon to maintain order when Lau-
 ffer came to the Steele home, but
 two weeks ago they arrived ten
 minutes late during which time
 Lauffer had seized his little daugh-
 ter and fled with her back to Grant
 Park.

After hearing Mrs. Steele's story,
 the board instructed the clerk, Paul
 J. Roesenen to write a letter to
 Judge Hill setting forth the story
 as told by Mrs. Steele and asking
 him to take action in the matter to
 stop a recurrence of these scenes.
 The letter was to have been pre-
 sented to the Judge by Trustee
 Ona E. McGovney Thursday morn-
 ing.

Wolf Road Opened

The Wolf Road which has been
 closed to traffic south of Orland
 on account of a stretch of paving
 and a culvert which had sagged, being
 repaired, has been opened to traffic
 the past week. With the Southwest
 highway open from the Wolf road
 to the Mapleroad at Marley excellent
 connection between Will and Cook
 counties is afforded.
